It's a different Telephone today

The telephone instrument in your home may have been put there prior to 1920. It may be the same instrument today in looks, in feel, in weight, as it was on the day it was installed. But in usefulness to you, it has grown to almost twice the original.

This is because in conduits underground, in cables swung on poles, in lines of wiring that penetrate to new places, in homes and business houses here, there and everywhere, we have been implanting values and adding equipment that have directly benefited your instrument.

Almost twice as many telephones are now connectible with yours as in 1920. Meanwhile, the quality of service we render has been advancing. Transmission is clearer. Thru technical improvements, the making of connections has been speeded up. More long distance facilities have been provided. The telephone in your home is like a window, looking out on the world, that has gradually turned to plate glass.

The outlay for telephone construction in the Pacific System during the next 5 years will exceed an average of \$63,000,000 a year. We are arranging now for voice-communications that you will wish to hold years hence, with people whom you do not yet know.

The progressive dairyman eliminates "boarders"

Feed, housing and labor costs in dairy farming are practically the same for all grades of cows. Therefore, by standardizing on pure-breds producing up to 4 1/2 times more milk than is given by the average cow, income is correspondingly increased with but little added cost.

For example, compare the 3 gallons of milk per day produced by the average cow with the 13 1/2 gallons given by Idaho Piebe Priscilla, 3-year-old, pure bred Holstein-Friesian owned by University of Idaho College of Agriculture. Recent tests credit Piebe with 3024 pounds of milk in 30 days, more than 100 pounds (approximately 13 1/2 gallons) per day.

Demonstrating the profit of pure bred stock to the dairy farmer will be one of the features of the forthcoming 19th Annual Pacific International Livestock Exposition, at Portland, Oregon, Oct. 26-Nov. 2. And because we here at the First National Bank believe dairymen can learn much of value in their farming activities, we recommend attendance at this year's Exposition.
