A few years ago boys used to chase chickens with an axe; now they use automobiles unless they develop "auto intoxication" which is sometimes caused by an absent minded driver drinking the stuff he had intended to put into his radiator.

Mistakes will happen; however you won't go wrong if you depend on to give you greater mileage at lower ultimate cost. The super walls of these tires plus resilient wear resisting tread account for their ability to render superior service.

**Give a thought to up-keep cost when you buy your new car**

THE new Ford car is a good car to own and drive because of its low up-keep cost. It has been built to endure—to stand up under thousands of miles of steady running over all kinds of roads. Reports of its reliability come not only from Ford owners, but from experienced garage men and mechanics, large industrial companies, and officials of Drive-It-Yourself concerns which keep definite day-by-day cost figures. As a matter of fact, the economy of the new Ford is as unusual as its beauty, speed, safety and comfort. The quality that has been built into every part will save you many dollars each year in repair bills. In other words, you save money when you buy the new Ford and you save money every mile you drive. That's something to think about when you are buying a motor car.

**What Lubrication is to Machinery.. Firestone Gum-Dipping is to tires.....**

AS THE film of oil prevents friction of metal parts, so does the film of rubber surrounding every fiber and strand of Firestone cord, protect it against heat and friction within the cord itself due to continual flexing. This means that you get most mileage for least money—with greatest safety, comfort and satisfaction—when you equip your car with Firestones.
