**We Have For Sale Cheap Production**

To anyone who has been in the manufacturing business—whether on a large or small scale—this statement is obvious.

Power is an item in all manufacturing costs. In mass production it is a small item. In highly specialized production, with a limited production, it is a large one.

We offer the cheapest, most favorable power the industrial world has ever known. From the point of view of the manufacturer we recognize no competitors.

If you are not using central station power, see us. We can cut your production costs and at the same time create better working conditions for your employees.
