ity Christmas tree this year with the school and churches uniting and the program to be given at the school house. Mrs. W. O. King, Mr. Johnson and Geo. O. S. C. Tells How to Make and Use Fondant

An abundance of candy, in most American homes, is more essential a part of the Christmas festivities than the traditional holly wreath.

And in making Christmas candy, ability to make good fondant has been found almost essential if a variety is desired, as it can be used as the basis for so many attractive confections.

For instance, says Miss Amelia Burns of the home economics department of Oregon State college, it may be shaped into bonbons, with nuts, or candied or dried fruit on top or inside. Or the bonbons may be rolled in chopped nuts, coconut, chocolate shot, or tiny colored candies. Candied fruits, or chopped nuts, or combinations of these are sometimes kneaded into the fondant, which is then shaped into bonbons or made into loaves and cut into slices.

Fondant may be colored and used in various ways, says Miss Burns. Two or more layers may be made into loaves, using different colors and combinations of nuts or fruits for each layer and sliced. A chocolate layer on a white layer, rolled up like a jelly roll and cut gives a pretty effect.

Colored fondant may also be melted and used for coating fruits, nuts, etc., or made into patties of various colors and flavors. Either plain or colored it is often used to stuff dates or prunes, or as centers for chocolates.

To make fondant Miss Burns recommends the following recipe:

- 2 c. sugar
1 c. water
1-8 t. cream of tartar
or
2 c. sugar
1 1-4 c. water
2 T. light corn syrup

Put ingredients in sauce pan and cook, stirring constantly until the sugar is dissolved. Remove the spoon and do not stir candy again during the cooking. When the candy begins to boil, cover the saucepan and cook for 3 to 5 minutes.

Remove the cover and continue cooking until the soft all stage is reached (238-240 degrees). From time to time, wash away any sugar crystals which appear on the sides of the saucepan. Use fork or spoon covered with cheesecloth and dipped into warm water.

When done remove from fire and pour at once on a cold wet platter. Cool to lukewarm; then beat until the fondant becomes white and creamy. Add flavoring and knead until the mass is smooth and no lumps remain.

Fondant is better if allowed to ripen 24 hours before using. It is covered with waxed paper and placed in tightly covered jar. It may be covered with damp cloth if it dries out too much.

in joint session with Lexington grange for the purpose of installing officers. The Pomona grange master, Brother Charles Wicklander, acted as installing officer and was assisted by Mrs. Royal Randa of Boardman grange, and Joe Thornburg of Lexington grange. The meeting, which was public, was well attended. After the installation, a program consisting of singing and speaking was enjoyed. Special stress was put on the origin of the grange, on account of the nearness of Founder's Day. Orville Cutsforth gave a summary of the life of the grange from its beginning. Lunch was served and dancing was participated in for a short time after the meeting was over.

HELPFUL HINTS How to catch Whiffoofs: As the Whiffoop is a very tasty morsel we all desire a mess of them and the Editor has found the following method very successful. In July carefully cut a hole in the ice on any lake, dig a hole in the water and line with bread and butter. Lay a banana peel in the hole and when the whiffoop whiffles he will slip on the banana peel and is then ready to cook. Roast on an oak board in a cool oven and when done, throw the whiffoop away and eat the board.
