The annual report of the district given by Mrs. Mead at the school meeting shows the district to be in better shape financially than for many years, with \$8,391.32 gain made in the school warrants. There is now a warrant indebtedness of \$23,030.94 while that of last year was \$31,402.26. The board of directors are deserving of much credit for the splendid way in which they have handled the financial situation for

the district for it was a critical condition with a possibility of having to close the high school. But if the tax money continues to come in, the district will eventually catch up on its warrants which call for such a high rate of interest. We are now reaping the whirlwind of wartime prices and extravagance.

Mr. and Mrs. Mitchem of Umatilla stopped overnight Tuesday at the Flickinger home on their way home from California.

Beatrice Weed stopped for a short visit at the Wilson home on her way to Condon from La Grande, where she attended normal school.

Where kitchen debris is to be burned, unnecessary work will be saved by scraping it directly onto a paper instead of some container which must be washed later.

**To Women Who Travel**

This bank recommends the new dollar size American Express Travelers Cheques as the ideal travel funds, to all its patrons and, in particular, to women who travel.

The woman carrying Travelers Cheques is not alone even though she may be traveling in far off Siam. American Express couriers meet her at piers and frontier points and await her at trains; interpreters assist her through the customs; she uses the numerous American Express offices as her mail addresses; their efficient travel men plan her trips and arrange for her accommodations at the better hotels; in a word, her journey is everywhere made more pleasant and comfortable.

As a thoughtful gesture to women who travel, the American Express has reduced its Travelers Cheques to the size of the new U. S. Currency, so that a compact, trim wallet of Cheques takes up but little storage space in the interior of the fashionably small handbag.

**EDITORIAL**

There never was anything made but what someone could make it worse and sell it for less. But in the end one gets just what he pays for.

Pat, who was moving, had asked two of his friends to carry his chicken house around for him. (A Tum-A-Lum design.) They found this to be a very strenuous job, but struggled on. About half way they set the house down for a rest when one of them suddenly exclaimed, "Why where is Pat?"

"I'm all right," came a voice from inside the chicken house. "I'm carrying the perches."
