

BOARDMAN

MRS. A. T. HEREIM, Correspondent.

Boardman experienced a real thrill on Saturday evening. A call came from west of town for a towing car to Barlow's garage, and when Guy Barlow found the two men intoxicated he refused to let them drive their car farther. They became enraged and performed in a manner not unusual to those who are prone to imbibe "white mule" or whatever it was. One of the men struck Mr. Barlow, and the other jumped from the car which was traveling at a good clip. When taken before C. G. Blayden they continued their abusive tactics and nearly wrecked his office. They refused to give their names; in fact they acted in a manner quite unbecoming, so they were loaded into a car and Guy took them to Heppner. They gave a continued performance all the way over, and since the deputy possessed only one pair of handcuffs, he handcuffed them together, but each man had a perfectly good hand which he made desperate efforts to use on his captors until they reached the county seat when they were placed in the county jail. Guy was called to Heppner Monday when the two were tried.

The interest isn't as great as it might be but the new officers are looking forward to your support. Begin to plan a separate booth of your own. We are planning no using the gym so there will be plenty of room. The fair board have secured the services of Mr. O. I. Paulson of Portland to act as judge. POPULAR SUMMER FLAVORS.
Chocolate, of course, comes in for some good midsummer service. And sandwiches spread with pate de foies gras are as delicious in July as they are in December. But it is fun to try using the natural food flavors as juices for bottled extracts, just to give the palate a change. Then, when summer has gone, taking with her many fruits and vegetables, we will fall back on our extracts and powders with renewed relish and appreciation.

Lemons, without any publicity, are probably the most used of summer fruits. They are, of course, all-year-round fruits. But in summer they are used as at no other time. The gallons and gallons of lemonade that are consumed prove that fruit gelatine is an ever delicious summer dessert that can be changed every day if you wish. The foundation may be of any one of the good fruit flavors, and the fruits may vary from strawberries to red raspberries, cherries, peaches, pineapple, with an ever reliable, interspersing of grapefruit and orange.

HARVESTING MACHINERY

Should be selected with care and judgment, for in making selection of equipment that is to have the important work of preparing the crop for market or use, only the most efficient and dependable machines will return the greatest benefit for the large outlay of labor and expense already incurred in bringing the crop to maturity. Not only should one consider the way the machine will perform this year, but how it will stand up and give efficient service over a period of years. Known throughout the agricultural world as the finest in farm machinery are the products of

McCormick-Deering

Look to your needs now, and order that needed mower, binder or combine. To insure a good crop next year, the summer fallow must be kept free of weeds in order to conserve moisture. This can be well done with either a McCormick-Deering or a Cheney Weeder. Let us demonstrate to you the advantages of our line.
