

The Way of Life

by BRUCE BARTON

SITTING

Mr. Charles M. Sheldon wrote "In His Steps," the book that sold a hundred million copies.

I asked him once to tell me about the greatest sermon he ever heard.

"I don't know that I can name the greatest sermon," he answered, "but I can tell you about one of the most interesting."

"It was in London. The preacher had won a great following by the unusual character of his mind and the directness of his speech."

"On this particular morning he started the congregation with a text which most of them did not know is in the Bible."

"In the year that king Uzziah died, I saw also the Lord sitting upon a throne high and lifted up, and his train filled the temple."

"I wondered what in the world anybody could find in that text to hang a sermon on. I did not have long to wait."

"The preacher proceeded in vigorous tones: 'I direct your particular attention to the one word sitting. The great king, Uzziah, had just passed away. You would expect that there would be excitement and confusion in heaven. Angels would be rushing around asking, "What is going to happen?" and "What shall we do?"

"Was that the case? Not at all. Behold the utterly unfurnished Lord

sitting upon a throne, high and lifted up. . . . I want to preach to you about the eternal patience and tranquility of God."

That story has always stuck in my mind. I like to think of the picture—the little kingdoms of the earth in turmoil, while the Lord sits quietly upon the throne, knowing that time will quiet the turmoil, and that the crisis will pass.

If you ever have occasion to write down the attributes that make men successful, do not fail to include staying power.

I know a man who has grown rich beyond any of his associates, though he is in many respects the least brilliant of the lot. But he had great patience and stick-to-it-iveness. When the others became excited and pessimistic, and sold their stock, he just sat tight. And time and the growth of the country have carried him high.

I read about all the men who thought they were smarter than Lincoln—Seward and Stanton and Chase—and maybe some of them were. But Lincoln had a great philosophy. When things were at their worst he would say, "This too will pass."

Every tough thing passes. Almost every problem becomes less hard under the softening influence of time. And when the turmoil is thickest the wise man climbs up on his great high throne and calmly and quietly sits.

INSTITUTE SPEAKER

H. T. Vance

Retail advertising, salesmanship and window trimming are topics covered by Mr. Vance during the two-day business institute held here yesterday and today.

tors of electricity. Some of the changes persist after the pressure is removed.

What is the good of such experiments? Science doesn't know nor care. Science is content to discover new facts, leaving it to inventors to apply them to human uses.

Hyslop Returns After Year at Washington D.C.

G. R. Hyslop, head of the farm crops department at O. S. C. and one of the most widely known specialists among the farmers of Oregon, has returned to the college after a full year spent in Washington D. C. heading a committee appointed to investigate grain grades and standards throughout the United States and the administration of the grain division of the bureau of agricultural economics.

Professor Hyslop first went east on what was to have been a three-months mission for the department of agriculture, but it was later decided that the committee should study the entire subject more thoroughly and assemble enough data to make specific rather than general recommendations for all grain grades throughout the country.

As federal officials asked for repeated extensions of Hyslop's leave rumors spread through Oregon that he was going into the federal service permanently. Like the man who came back after being listed as dead, Hyslop says the reports were grossly exaggerated and that he has come back to Oregon with a great deal of information that may be of real value to the Northwest grain producers.

Mint's For the Home

by Nancy Hart

PEACHES

Peaches are, and for the next few weeks will be, at their best and cheapest. So have them every day and more than once a day, if your family likes them.

And if you use a little imagination in serving them there are few families that will tire of them before the end of the season.

Here are some ways of using them to suggest new ideas to the cook:

Peach Foam

Press three or four ripe peaches through a colander making one cup pulp and juice together. Stir one envelope gelatin with one-half cup of sugar and dissolve in one cup of boiling water. Add peach pulp and pinch of salt. Set in cool place, and when beginning to jell add the well-beaten whites of two eggs, and beat all together until very thick so it will not separate. Pour into molds and set in cool place until firm. Serve with custard sauce.

Baked Peaches

Plunge the ripe peaches into boiling water for a moment, then the skins will rub off as easily as the skin of a scalded tomato. Arrange in a rather deep baking dish, sprinkle with sugar and cinnamon and dot the tops of the peaches with bits of butter. Add a cup of boiling water to the baking pan and bake in a steady, moderate oven. Serve hot or cold.

Peach Fritters

Peel and split ripe peaches, sprinkle with powdered sugar and let stand for an hour. Drain, dip in fritter batter, fry brown in deep fat, drain, sprinkle with powdered sugar, and serve.

Peach Delight

Peel and split ripe peaches and fill a baking dish, sprinkling each layer of fruit with sugar. Dot the top with butter, add a cup of water and sprinkle with flour. Make a crust of one and one-half cups of flour sifted with a little salt and a teaspoon of baking powder, rubbing into the flour and then half a cup of lard and adding ice water to mix. Cover the peaches with a thin sheet of the dough, slit the crust and serve hot with fresh cream.

Peach Snow

For peach snow, beat a cup of cream until it is stiff and add half

a cup of sugar and two egg whites, beaten stiff. Cut up a quart of peaches in a glass dish and pour the cream mixture over them. The peaches and the cream should both be chilled through before mixing. Serve them as soon as they are mixed.

IRRIGON

Mrs. Stegmiller of Walla Walla is spending a few days in the home of her brother, Roscoe Williams.

Wilbur Stevens, who suffered quite serious injuries in an automobile accident last Monday evening on the road between Boardman and Irrigon, was able to be removed from the hospital to his home here. An X-ray picture revealed a slight fracture of the skull and a broken nose. He was also cut severely about the face and head.

Chase McCoy returned to his home in Portland Sunday after several weeks visit with his uncle, Emmett McCoy.

Mr. and Mrs. Vernon Jones were Hermiston visitors Friday.

Mrs. Roscoe Williams was taken to The Dalles Tuesday and was operated on Wednesday morning. Lat-est reports were that she was getting along as well as could be expected.

Nellie Leicht and Billy Markham spent several days last week in Prescott, visiting friends.

Bert Dexter left for Wallowa Wednesday where he expects to work in the harvest field.

The H. E. club met at the Charles Benefield home Thursday. A pleasant social time was spent, the guest of honor being Mrs. Carl Haddock. The members present expressed regards in the form of many lovely presents.

A delicious lunch was served by Mrs. Edith Puckett, sister of Mrs. Haddock.

Mr. and Mrs. Frank Brace and family, Mr. and Mrs. O. Coryell, Earl Isom and Miss Leach, Will Grabell and Ruth Bonell and several other young folks motored to Hermiston Sunday evening to see the Vitaphone picture, "The Gold Diggers," and expressed themselves as being well pleased.

"What is the name of your car?" "I call her 'Shasta!'" "Because she's a 'daisy'?" "No, because she has to have gas, she has to have oil, she has to have air, she has to have something all the time."

AROUND THE STATE WITH FARMERS

Oregon City—Cooperative experiments with fertilizers on grain and legumes carried on by County Agent J. J. Inskip and several farmers of Clackamas county have shown that combinations of nitrogen and superphosphate are more effective on the grain yield, and that the higher the application of ground limestone the more vigorous the legumes. Farmers cooperating in the tests are Alfred Anderson of Colton; J. A. Shibley and Sons of Springwater, and Louis Hoffmeister of Boring.

ine, designed under the supervision of W. J. Gilmore, professor of agricultural engineering at O. S. C., and County Agent W. Wray Lawrence, has been purchased by Wasco county and will be used for ridding the farms and roadsides of weed pests. The machine will also be made available to farmers at cost.

Eagle Point—This district is now growing about 2000 acres of Ladino and Alsike clover pasture, which is more than the cattle and sheep can use, reports R. G. Fowler, county agent. The seed is sown largely on stony, unplowed ground and with the abundance of water available makes remarkable growth.

The new hardware clerk prided himself on always having a snappy comeback.

"Do you keep refrigerators?" the timid-looking woman inquired quietly.

"No," he snapped, "we sell them." "Anyway," she said, as she stroiled toward the door, "you'll keep the one you were going to sell me. Good morning."

Klamath Falls—About half an acre of Minnesota No. 13 corn is being grown by Oscar Hommer of Tule Lake in cooperation with County Agent C. A. Henderson to determine its adaptability for this district in regard to frost resistance, maturity and yield.

The Dalles—A weed spray mach-

UNION PACIFIC

PORTUGAL

Travellers returning from the little-known country of Portugal report that it is the most honest country in the world. In the hotels the key to your room is hung on a hook outside of your door and nobody ever steals anything. You can leave your suitcase, your camera or your overcoat on a railroad train or a station platform or in a parked car on the street, and nobody bothers them. The people are polite and hospitable as well as honest. If a sudden shower comes up, house doors open and the occupants ask passersby to step in for shelter until the rain stops.

That sounds like an earthly paradise. It would be perhaps, if Portugal had a stable government. In the last twenty-six years there have been twenty-six revolutions. Under the present President, General Carmona, the little nation is getting along nicely.

POPULATION

Early reports from the Census office indicate that the decline in the birthrate in the past ten years is greater than ever. It begins to look as if, in another ten years we will have come to an annual increase of only 500,000 or less than one half of one percent, in population. And that will have tremendous economic significance.

Cities will not grow so fast. Fewer new schools will be needed. Real estate values will not increase so rapidly. Fewer homes will be built. The proportion of elderly people to young will be larger, and old age pensions and retirement funds will become matters of prime importance.

Those are not considerations for the distant future. They are based upon facts which are here, now, and may affect economic conditions very soon.

SKYSCRAPERS

New York's newest skyscraper, to occupy an entire city block on the East River waterfront at the foot of Wall Street, will be 105 stories high. There is no economic limit to height except the congestion of traffic which comes from crowding so many people into a small area.

Cincinnati has a new solution for the skyscraper problem. A new building going up there will be 46 stories high and will be a combination of office buildings, hotel and parking garage, with two large department stores and numerous specialty shops on the lower floors.

In the old days business men and their employees used to live "over the shop." We may be coming back to that in the big cities, with apartment houses in the upper floors to house the people who work in the stores and offices below.

INSECTS

The other day at my farm home we started to replace a worn door sill. When we took the old board off we found that black ants had eaten away the heavy timber which forms the sill of the house itself, for a distance of several feet. We took out more than two quarts of ants and about a pint of ant eggs, and then had the expensive job of fitting a new timber in place.

The war between man and insects is relentless and unceasing. Along the country roads near my home I frequently meet this summer the U. S. Department of Agriculture "bug men" who are spraying trees in the effort to get rid of the Japanese beetle, our newest insect pest. I found a great colony of tent moths

in an old pasture beyond my wood-lot. A new pest is beginning to eat up our way; another is destroying the willows along the brook and river.

Most of these pests, like the gypsy moth which is killing the New England elms, and the chestnut blight, which has destroyed every chestnut tree in the East, are imported. The Government maintains a plant quarantine, but every now and then some new pest slips across the border.

PRESSURE

Ice cream will not melt at a temperature of 180 degrees is the latest scientific curiosity. It has been produced by Professor P. W. Bridgman of Harvard University. All that is necessary to keep ice from melting under a flame is to subject it to a pressure of 290,000 pounds to the square inch.

Professor Bridgman's experiments with high pressure have given many surprising results. Many familiar substances change their characters under pressure, much as human beings do. Thirty-nine different metals become better conduc-

CHEVROLET ANNOUNCES DE LUXE WIRE WHEELS at no extra cost

Chevrolet again adds extra value to the Chevrolet Six! Those who prefer may now have any passenger model equipped with beautiful de luxe wire wheels—at no additional cost! Designed especially for Chevrolet, these wheels incorporate many important features that have won favor on cars much higher in price. And they give an added touch of individuality to a car already famous for its beauty.

A variety of attractive new colors

In addition to this de luxe wire wheel equipment, Chevrolet now makes available a wide choice of rich and distinctive new color combinations on all models. You are invited to come in—NOW—and attend the first showing of six-cylinder Chevrolet models with these new extra-value features.

SIX-CYLINDER SMOOTHNESS AT LOW COST

CUSTOMERS' WEEK

To New Customers:

You are cordially invited to visit our store any time, any day, to inspect them at your leisure. See this answer and better food service for yourself! (A hearty welcome awaits you here-always!)

To Present Customers:

In appreciation of your loyal patronage, we are offering a host of values and helpful courteous service. Come in and bring your friends. Remember, our store are you store this week and every week!

This community has been good to us—so we are going to be good to it! Consequently we have set aside this week as CUSTOMERS' WEEK and have made careful preparations to give you of our best—in merchandise, low prices and quick courteous service. Just put us to the test this week—let us show you how much we truly appreciate your business.

Friday, Saturday, Monday Specials
