Hints for the Home

SANDWICHES

When in doubt about refreshments for the summer party, serve sandwiches—dainty little sandwiches that intrigue the appetite and satisfy it without giving one a feeling of repulsion.

If you serve afternoon tea—which usually consists of iced drinks in summer—serve dainty little sandwiches with crisp lettuce, cucumber, or green pepper and cream cheese filling. If you want to provide refreshments for tired tennis players make some dainty sandwiches which will prove more acceptable than cakes or crackers. For the afternoon or evening bridge party when light refreshments are wanted, serve a fruit salad, with sandwiches, and a choice of hot coffee or iced drinks. For the late supper after dancing a plate of carefully made little sandwiches and glasses of ginger ale provide just the bit of refreshment that most people find most acceptable.

Spanish Omelet

A well made and well seasoned Spanish omelet is a lunch in itself. Melt a tablespoon of butter in a saucpan, add an onion chopped fine, six mushrooms and one red and one green sweet pepper cut in small pieces, cover and cook slowly for twenty minutes. Make a plain omelet from six eggs, turn it on a hot platter, pour the Spanish sauce around it and send at once to the table. Spanish omelet is sometimes made by American cooks from stiffly beaten eggs, the yolks hardly mixed with the whites even after they are cooked.

WITH FARMERS ABOUT THE STATE

Coquille—Purple vetch shipped from the Arago and Camas Valley sections of Coos and Douglas counties last month amounted to 37,500 pounds, of which 31,000 pounds, or one carload, was sold to a Los Angeles firm at 7 cents delivered. A later shipment of 6500 pounds to Marysville, Calif., brought 7 cents f.o.b. shipping point. This seed belonged to J. H. Parrott of Camas Valley, while the first shipment constituted the crops of several growers, pooled by George H. Jenkins, Coos county agent.

Medford—Pear growers of Jackson county have been advised by L. P. Wilcox, county agent, that much loss can be avoided if all blight cankers and branches from infested trees are removed immediately, as those infections which are still active will tend to move toward the trunk and roots with the downward flow of the sap which precedes the dormant period. Reddish and bronze colored leaves on pear trees are good indications of blight infections Wilcox says.

Dallas—Considerable tilling work is being done by Polk county farmers to change fields so that they can be used for fall seeded crops and

for red clover which has been found necessary in the rotation program of the county. A mechanical ditch digger is used, which greatly speeds up the work. Crops being harvested from the drained areas prove the value of the investment.

Corvallis—The benefit of lime on red clover was demonstrated on the Anthony Brothers farm in northern Benton county, where limed fields yielded a good hay crop, while untreated plots dried up. Orders for a carload of limerock have just been

pooled in this district by County Agent C. R. Briggs.

Registered Hampshire Rams for Sale—Some ewe lambs also, at John Bubeck ranch 8 miles south Heppner Junction. 24-7p.
