

TREES AVAILABLE FOR FARM SETTING

Forest Nursery at Corvallis Has Much Nursery Stock Ready For Fall Delivery.

Howling winds and scorching sun need have no terrors around Oregon rural homes of the future if the farmers of today take advantage of a liberal offer of the state to supply trees for windbreaks, shade or woodlots at almost no cost.

At the Clark-McNary forest nursery operated at Corvallis in connection with the Oregon State college forestry arboretum there are now more than 500,000 one and two year old trees ready for fall distribution to farmers at the trifling cost of \$2.50 per thousand.

The trees to be sent out include conifers and hardwoods of many kinds, some of which are adapted to any section of the state. The county agents are ready to advise as to the best species to plant for various purposes and to help place the orders. Thousands of these trees were distributed last year and are now well on their way toward beautifying landscapes, protecting crops or otherwise making rural life more pleasant and profitable.

IRRIGON

Mr. and Mrs. Fred Houghton left Sept. 29 for a day's stay in Portland. They returned the 30th, bringing Mr. Houghton's mother with them. Donald and Edward remained at home and made the trip to school Tuesday morning on their bicycles.

F. C. Frederickson is able to be out and around again, after a week's illness.

Mrs. Oliver Coryell has been removed from The Dalles hospital to the home of her parents, Mr. and Mrs. Lorenson. She is expected home on Tuesday, Oct. 7.

Robert Smith made a business trip to Heppner Thursday.

Frank Leicht is driving a new car. He also has a delivery car.

Wesley Chaney and family are home again after a few weeks' stay at the home of his brother, Earl.

Charles Acock had the misfortune to lose one of his best cows the past week with milk fever, and he thought there was no chance for another one to live, as it also was stricken with the fever.

Mr. and Mrs. Don Brooks are at the home of Mrs. Brooks' parents, Mr. and Mrs. George Haskell. They are here to make their home on the Haskell ranch. Mr. and Mrs. Haskell will leave before long for the Bud Crofton ranch in Washington.

The community is sorry to see Mr. and Mrs. Haskell leave, but welcomes Mr. and Mrs. Brooks.

The aeroplane signal lamps were out of commission for a couple of days the past week.

Geo. E. Hendrick is home again after a couple of months spent working in eastern Oregon.

Mr. and Mrs. Roscoe Williams and family were Sunday dinner guests at the Frank Brace home. A lovely chicken dinner was served.

John Smith, his father, mother, Mrs. F. C. Frederickson and Mrs. Henry Weir left Friday for the coast going to Portland, Olympia and Everett, Wash. They will return Tuesday.

Several new radio sets have been purchased the past week, and everyone is listening to the World Series baseball games. Frank Brace, Fred Markham, Carl Eisele, and Tom Caldwell are among those with new sets.

Three of F. C. Frederickson's small boys are sick with the mumps. Shirley has been staying at home to look after the children while her mother made a trip to the coast. The boys came down with mumps since Mrs. Frederickson has been away.

Florence Brace is feeling fairly well again, and will be able to attend school again Wednesday.

Mr. Weir and Mr. Dawald were on the institute program at Heppner Monday and Tuesday.

BROADCASTS FROM KOAC.

To Broadcast Institute. The Business Institute of the Air is another new program which has recently been added to the KOAC schedule and will be broadcast at 7:30 Friday evenings, beginning October 10. During the past three years Oregon merchants have become acquainted with the "Business Institutes" sponsored in many cities of the state by the college. The "Business Institute of the Air" will make the work of the institute available to all retail merchants in Oregon.

Weekly Musicales Started.

The weekly musicale from station KOAC is again scheduled for Tuesday nights at 7:30 o'clock. The program features students in the Oregon State college department of music. This week Ronald Hall, pianist of Corvallis, and Misses Thelma Davis, contralto of Salem, and Marie Millett, violinist of Portland, will be heard.

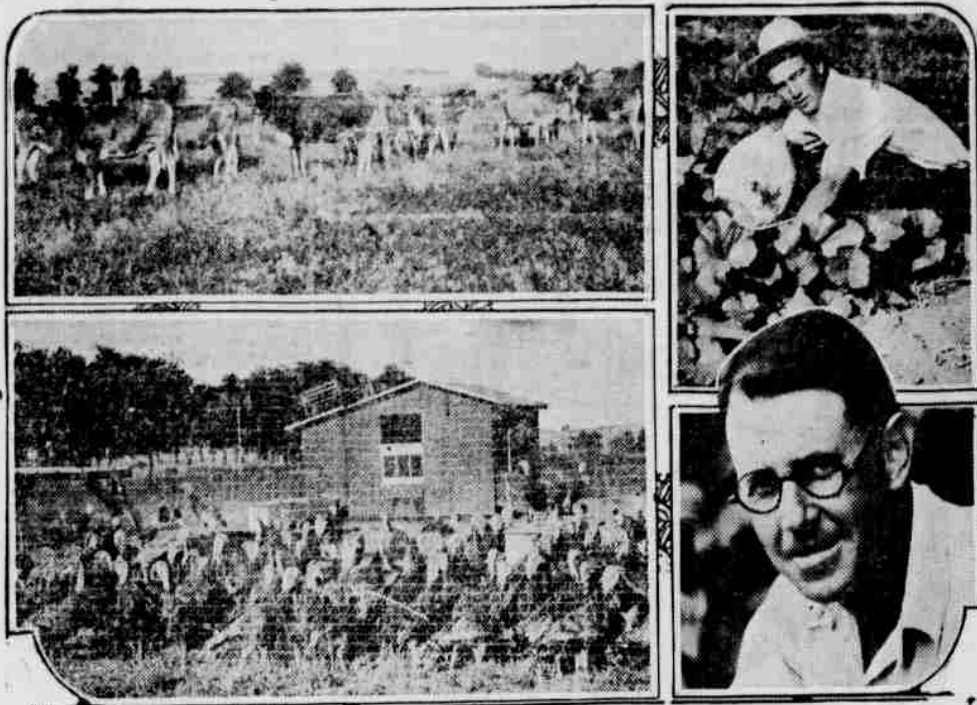

Shorthand Contest on Air

Another radio shorthand contest similar to the one that proved so popular last year is to be broadcast from station KOAC, beginning Wednesday evening, October 8, at 7:30 o'clock. Prof. H. T. Vance, head of the department of secretarial training at Oregon State college, will again be in charge of the contest.

Football Broadcasts Liked

The broadcasting of night football games from Bell field at Corvallis by station KOAC is proving very popular especially with alumni of the college, many of whom are writing in to express their appreciation. W. L. Kaddery, program director, announces that all home games played by the college team will be broadcast, and that most of the road games will be relayed through the college station. The next one will be the California Aggie-O. S. C. game, Friday, October 11.

Oct. 10 Is Turkey Field Day at Hermiston Station

Scenes on the Hermiston branch experiment station. Above, herd of Jersey heifers on experimental sweet clover pasture; blight resistant squash which withstands curly top disease. Below, flock of 250 turkeys raised this year under confinement method; Harry K. Dean, superintendent.

Hermiston.—Possibilities of raising turkeys under confinement as a means of controlling disease will be explained at the Hermiston branch of the Oregon State college experiment station at a public field day Friday afternoon, October 10, announces Harry K. Dean, superintendent. The station this year pur-

chased 250 poult and raised them in small alfalfa plots, changing the birds to a new plot every three weeks throughout the season. Under the disease control plan the ground will not be used again for turkeys for three years. Early indications are that the plan will work well though additional

years will be required to draw definite conclusions. At the meeting Friday H. E. Cosby, poultry specialist from the extension service will be present to present information on turkey feeding. Other work of the station may be viewed the same day if desired.

PROFITABLE PORK MADE FROM WASTE

Present Market is Favorable for Growing Swine from Offal And Grain.

Ordinary farm wastes such as skim milk, whey, cull fruits, and vegetables may be turned into real money by marketing them through hogs in the present condition of the market, points out H. A. Lindgren, livestock extension specialist at Oregon State college. Their full value will not be obtained, however, unless these wastes are fed with grain.

This is a good time to check up on feed conditions on the farm, and if farm wastes are not being fully utilized a few more hogs can usually be added to the farm with profit," says Mr. Lindgren.

"Fever hogs are on Oregon farms just now than for several years, a condition which has helped make the market very satisfactory during the past few months. Cheaper grains for feeding is another favorable condition. In feeding grain, however, it is important to remember that unless skim milk is fed, ten per cent by weight will be needed of protein feeds, such as tankage or fish meal."

Present conditions will naturally stimulate hog production in Oregon, Lindgren believes, so the prudent farmer will not be stampeded into extra heavy expansion. It is wise to measure such expansion by available pasture and farm waste, being sure that all of the latter are being utilized profitably.

Here you are from producer to consumer. I have about two thousand boxes of choice winter apples, mostly Winesap. Picked variety which can sell you from trees, buyer to furnish own containers, at 50 cents per box. This is first class stock. Thomas Campbell, Hermiston, Ore. 30-31.

Leonard Schwarz delivered a truck load of live beef to the Portland stock yards on Sunday returning Mnoday.

Purina Makes the Difference

Equal in laying ability. But the hen on the right was fed a common grain ration while the other was fed Purina Chicken Chowder and Purina Hen Chow.

Purina Poultry Chows form a complete ration, containing material for an equal number of yolks and whites.

Good business deserves good banking connections.

"Good Business" does not necessarily mean big business. This bank appreciates, and tries to render just as loyal services to its smaller patrons as to the larger ones.

Regardless of volume, we feel that we can work together and make it worth while for all of us.

EX-U. S. SENATOR ENDORSES SARGON

Sargon is rapidly becoming a household word throughout Canada and the United States. Thousands of grateful men and women from all walks of life have been lifted out of the throes of lost vitality, suffering, misery and ill health by its use.

In relating his experience with this famous medicine former United States Senator Thomas W. Hardwick, who served his state for six years in the Upper House of Congress, and who was later elected Governor of Georgia, said:

"I had lost most of my old-time energy and both mental and physical fatigue came more quickly than formerly. Constipation especially had troubled me for the past ten years and I had become accustomed to dosing myself with some physic or laxative every few days. My appetite was not keen and my meals did not seem to agree with me as they should. Sometimes I would feel positively wretched for days at a time. Sargon was highly recommended to me and I decided to try it.

"The medicine helped me from the very first. It gave me a splendid appetite. I don't know when I have enjoyed my meals more than I do now. I eat with more relish and experience no ill or uncomfortable after-effects whatever. Naturally my capacity for work has increased. I feel more efficient. I have more energy. In fact, I feel that I am in better health than it has been my pleasure to enjoy in many years, but most important of all, I no longer find it necessary to continually take laxatives and cathartics.

"I also took Sargon Pills with fine results and consider them a valuable part of the treatment.

"I take pleasure in endorsing Sargon for the genuine improvement it has brought about in my physical condition." Patterson & Son, local druggists, agents—(Adv.)

Whitewash on the trunks of fruit trees will actually make a difference of close to 10 degrees in temperature of the cambium layer and

thus greatly aid in preventing winter sun scald on the south side of trunks, according to experiments made at the Hood River branch experiment station. The white coating reflects the sun's rays rather than absorbing them.

Pasture for Sheep—1100 acres of stubble pasture; 900 acres have straw dumps on. Phone 10F41, Lone, Oregon.

REPORT OF CONDITION OF THE FIRST NATIONAL BANK OF HEPPNER, IN THE STATE OF OREGON, AT THE CLOSE OF BUSINESS ON SEPT. 24TH, 1930.

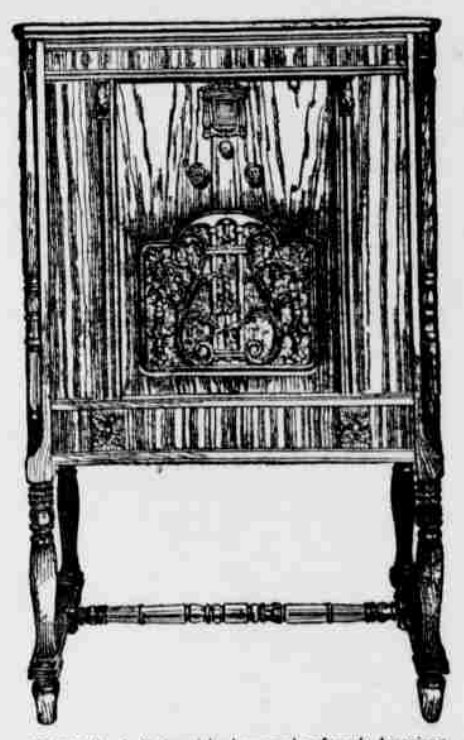

Table with columns for RESOURCES and LIABILITIES. Resources include Loans and discounts, Overdrafts, United States Government securities owned, etc. Liabilities include Capital stock paid in, Surplus, Undivided profits-net, etc.

State of Oregon, County of Morrow, ss: I, W. E. Moore, Cashier of the above-named bank, do solemnly swear that the above statement is true to the best of my knowledge and belief. W. E. MOORE, Cashier.

CITY-WIDE TEST demonstrates the POWER of GENERAL ELECTRIC FULL RANGE RADIO

Monday Evening, Oct. 6th Between 7 and 7:30 P. M.

- List of radio stations participating in the test: KGA Seattle, Wn.; KFI Los Angeles; KGO, Oakland, Cal.; Mexico City; KGW Portland, Ore.; KEX Portland, Ore.; KPRC San Francisco; KPO San Francisco; WLW Cincinnati, O.; KIX Oakland, Cal.; KHJ Los Angeles; KOIN Portland, Ore.; KFWB Hollywood; KQW San Jose, Cal.; KNX Hollywood; KSL Salt Lake, Utah; KFON Long Beach; KFJR Portland; KOAC Corvallis, Or.; KROW Oakland, Cal.; KGRS Amarillo, Tex.; KOY Phoenix, Ariz. And 15 or 20 other stations that call letters and names of the stations were not heard.

GENIUS, research, millions in money—have created the new radios. Would these new sets overcome the reception barriers of this town? We wanted to know—we selected the General-Electric Full Range radio for a city-wide test.

The results were amazing. Each turn of the dial brought new stations. Many heretofore extremely difficult to reach under the most favorable conditions, came in clearly, distinctly—free from overlapping. Convincing proof, this, of G. E. Power—of Full Range sensitivity, of hair-line selectivity—Full Range tone.

Improved Daytime Reception Power, undreamed of power, has been built into the General Electric Full Range radio. Such power brings you far better daytime reception both for near and distant stations. G. E. 90-Day Guarantee The General Electric radio—twenty million dollar product of General Electric research and General Electric engineers, is fully backed by the General Electric Company. Every General Electric radio carries a 90 day guarantee with a rigid inspection service at the end of that time.
