The emergency call, totalling \$10,000,000, was made by President Hoover to relieve immediate suffering in the drouth-stricken areas of the United States.

An invitation from the Umatilla-Wallula Cut-Off association, for the club to have representation at a meeting of the association in Walla Walla on January 28, was read and referred to the road committee to report back at the club meeting as the host many as the host meeting report back at the club meeting as the best means to secure per- judges, W. ### P. T. A. Benefit Slated

Mrs. Walter L. Johnson, impersonator and reader, will appear at the school auditorium-gymnasium tomorrow evening in an entertainment sponsored by the local Parent-Teachers association. The program will begin at 8 o'clock and admission prices announced are 35 cents for adults, 25 cents for high school students and 15 cents for grade pupils. The boys' and girls' glee clubs lotte Woods will appear in musical numbers between acts. Money raised from the entertainment will be applied toward the purchase of additional playgrounds for the school. Mrs. Johnson presents a full eve-

ning's program unassisted and comes to Heppner highly complimented by former audiences. She formerly appeared under the auspices of Gooding college, Idaho. Among many favorable comments on her work, has been said, "Her list of selections is wide and varied. She has one for every occasion and they are all rendered with such skill as to delight her audience," and 'Her manner is so unaffected and sympathetic that you see her characters, get their lessons and forget that she has been all of them."

### EGGS ONE OF BEST, CHEAPEST FOODS

O.S.C. Leader Says Eggs Are Helpful in Baby's Diet; Rich in Protein, Good Meat Substitute.

Eggs are among the most valuble, and at the present time, most economical articles of the American diet, says Miss Claribel Nye, state leader of the home economics divis-ion of the Oregon Extension service.

Because of their high food value and easy digestibility when properly cooked, eggs are one of the first foods to supplement the mother's milk in a baby's diet. They are among the richest sources of iron in human food, and also contain phosphorus and calcium in usable forms, Miss Nye points out, all of which minerals are vital to the growth and development of the body.

Eggs are also rich in protein, substance needed for the growth and repair of muscle, bone and blood. They are wisely used as a substitute for meat in the daily menu occasionally, because in addi-tion to furnishing the protein found in meat, they also supply the vitamins, which are lacking in meat, says Miss Nye. At present they are more economical than any but the cheapest cuts of meat.

There are numerous attractive ways of serving eggs, either alone or in combination with other foods, says Miss Nye, but their palatability as well as their healthfulness depends largely upon the care with which they are cooked. The chief point to remember in this connection, she explains, is that eggs, or any food containing eggs must be cooked at a low temperature. Cooking too fast or at too high a temperature tughens the eggs, or where they are being cooked in combination with a liquid, causes the mixture to curdle.

A number of standard egg recipes with variations have been compiled by the home economics department in Home Economics Circular 118, and are now available for distribu-tion to Oregon homemakers, says Miss Nye.
