The electric line has been extended to the country as far as Spagies' who have taken advantage of the service.

Adolf Skoubo, who now claims the honor of being the oldest original settler in the East End, was much surprised and greatly pleased to receive a copy of one of the largest daily papers from Denmark which carried his picture, his biography and a column featuring him as one of the pioneers in Danish library reform.

When Mr. Skoubo first came to this country in 1912 he was surprised at the size and number of libraries here, but what struck him more than anything else was the fact that all libraries carried professional books and books on art and science.

As there were at that time but few public libraries in Denmark except in the largest cities, he wrote an article to a paper there about conditions here and propounded the idea of starting small agricultural libraries in the different farming communities so that the small farmers, farm hands and others who could not get time nor afford to go to agricultural schools could borrow books and get at least the fundamentals in agricultural science.

Mr. Skoubo does not know whether the article was printed at the time, but 18 years after the idea is materializing, the paper dug up the article, printed it and proclaimed Mr. Skoubo one of the pioneers of the idea.

The Cooney's drove to Condon Sunday and visited overnight with Mr. Cooney's mother who has been quite ill.

Neil Shurman was the backbone of the Heppner offensive with 18 points, and a big factor in the local town team defeating a combined Umatilla and Hermiston team on the Umatilla floor Thursday evening.

Final score 27-9. The game was played under a handicap by the north Umatilla lads as they "took on" the Heppner team after playing a hotly fought battle between themselves.

Heppner supposedly had a game scheduled at Hermiston, but through a misunderstanding Hermiston went to Umatilla instead, and the Heppner boys followed them up. Other members of the Heppner squad were Bob Corral, Ray Ferguson, Bus Neel, John Farley, Dale Bleakman and Vinton Howell.

FORD SMOOTHNESS

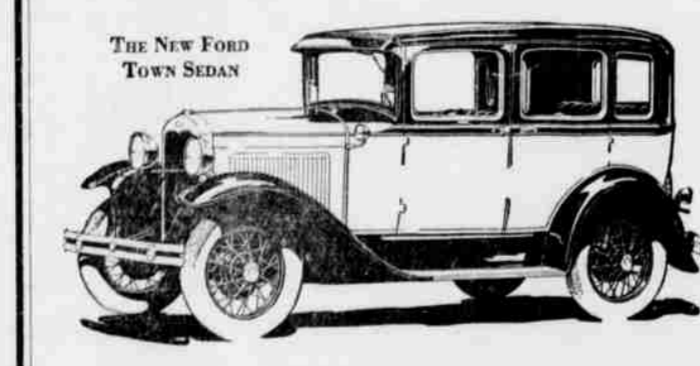

The new Ford has more than twenty ball and roller bearings

EVIDENCE of the high quality built into the new Ford is the extensive use of ball and roller bearings. There are more than twenty in all — an unusually large number.

At some points in the Ford chassis you will find ball bearings. At others, roller bearings are used regardless of their higher cost.

The extensive use of ball and roller bearings in the new Ford insures smoother operation, saves gasoline, increases speed and power, gives quicker pick-up, decreases noise, and gives greater reliability and longer life to vital moving parts.

Other outstanding features that make the new Ford a value far above the price are the Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, three-quarter floating rear axle, Rustless Steel, the extensive use of fine steel forgings, and unusual accuracy in manufacturing.
