

THREE HUNDRED AT FARM WEEK

Seed Industry Forms First State Council; Economist Sees Improvement Ahead.

More than 300 farmers, representing 18 Oregon counties and including several special groups such as the seed growers, hop growers, and a group particularly interested in pastures and irrigation attended the special Farm Science short course at Oregon State college last week.

The week's program included 125 lectures, demonstrations and special conferences, with daily addresses by Dr. W. J. Spillman, agricultural economist, U. S. D. A., Washington, D. C. C. B. Denman, livestock representative of the Federal Farm Board, spoke at the opening assembly.

A permanent organization, to be known as the Oregon State Seed Council, was formed by the seed growers in a special conference following a series of lectures on seed problems. A. M. Hand of the Carl-Hand Seed company of Portland, was elected president; Vernon Burlingham of Forest Grove, vice-president; and Grace M. Cole, seed analyst at the college, secretary. Proposed seed legislation was also discussed.

With 125 representatives of the hop industry present, this group also formed a temporary organization, to be perfected in permanent form at a later meeting to be held in Salem. Control of the hop downy mildew and improvement of market information service are two of the major problems on which the new group will cooperate.

Belief that prosperity can be brought back to the agricultural industry in the not distant future was expressed by Dr. Spillman. He reviewed the present situation, which he attributes to over-production, under-consumption and expansion in farm acreage due to new dry-land farming methods, and suggested complete embargo on Russian wheat and lumber and the conversion of part of this country's grain acreage to other uses as measures which would help solve the problem.

Lamb, buy a roast and let your wife dress it up some new way. Pretty soon you'll find that you do. Lamb is one of the most healthful of all meats, she said. Now's a good time to lay in a supply of woolen batting, bedding, and other woolen goods, too, she emphasized, while the price is low.

As a special musical number Mrs. W. R. Poulson and Mrs. J. O. Turner pleased the luncheon assemblage with a piano duet. Albert Adkins and John Wightman have charge of next week's program.

RIVER MEET SLATED.

R. H. Kipp, executive secretary of Western Inland Waterways corporation, and Capt. Arthur Wood, managing director, are scheduled to address a meeting at the Alpine high school, February 16, at 7:30 p. m. According to J. Perry Conder, sponsor of the meeting, these men have reported "the progress and plans to have barges on the river by early fall of 1931, and have assured a saving on the wheat shipments alone of a million dollars annually to Oregon and Washington, with an estimated saving of three million dollars annually on all commodities shipped to and from inland territory, besides other benefits which will come through industrial development."

Matinees Saturday and Sunday, Star Theater, at 2:30.

THOUGHT SHE WAS DOOMED TO SUFFER

for three years. I was miserable after meals with indigestion. My heart would beat so wild and fast and I'd get so short of breath that sometimes I'd think I'd smother to death. I was bothered with constipation and sick headaches and a dull pain in my side. "I will always feel grateful to Sargon and Sargon Pills. My appetite is simply wonderful now and I eat anything I want without suffering. For the first time in years I'm free of constipation and everyone of my troubles is gone. I feel as well as I ever did in my life."—Mrs. Viola Lamb, 6039 South Lawrence St., Tacoma.

The BEST Gray Hair Remedy is Home Made

To half pint of water add one ounce bay rum, a small box of Barbo Compound and one-fourth ounce of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Apply to the hair twice a week until the desired shade is obtained. It will gradually darken streaked, faded or gray hair and make it soft and glossy. Barbo will not color the scalp, is not sticky or greasy and does not rub off.

The Wickersham report drew the largest volume of publicity of any news break of the day, only to tell the world that the prohibition problem remains as much of a dilemma in the United States as ever. A mass of jangled opinions it gave naught of enlightenment. Its outstanding accomplishment is probably the bringing of Newton D. Baker into the limelight as a contender for the democratic presidential nomination in 1932 on a repeal platform.
