Grain is about as far along out his way as it usually is from the first to the middle of April, and should there be additional moisture the crop will be a good one.

EDITORIAL Disillusionment comes to the bride when she discovers that a husband makes the same kind of a noise as Dad did, when he is parting with money.

Unpainted houses depreciate 5% faster per year than a house that is kept properly painted. If your property is worth \$5,000 that means \$250.00 a year. It wouldn't cost that much to paint it and the increased joy and pride of ownership would pay bigger dividends than the banks pay on mortgages.

Never saw the bride yet that wouldn't stay happy if she had a nicely painted kitchen to work in. Do you realize that one third of a woman's life is spent in the kitchen. Brighten up your wife's work shop with Tum-A-Lum Kitchen-Brite.

Hope never dies. The fellow who spent strawberry season looking for strawberries in shortcake is now looking for an oyster in oyster stew.
