Thousands of men and women in the cities and towns served by the company own shares of our Preferred Stock, and have never failed to get their dividends regularly and promptly, every 3 months on August 1, May 1, August 1 and November 1.

We have only a limited number of shares to offer at this time. We would like to have enough so that every customer might have at least ONE share, but on that basis there isn't nearly enough to go around. The last time we offered our Preferred Stock many people who wanted to invest got their subscriptions in too late and were disappointed.

Applications for shares may be made at all our offices or through any of our employees. If it's not convenient for you to come to us, phone in and we'll gladly send a representative of the company to you.

Remember these 3 most important points:

1. This is a SOUND investment . . . not a speculation.
2. Our Preferred Stock has never failed to pay dividends every 3 months. This \$6.00 Preferred Stock pays a liberal return, considering SAFETY.
3. The company maintains a Resale Department to assist and advise stockholders who may wish to sell their shares.

WHY THESE SHARES ARE BEING SOLD

Low and steadily lowering electric rates to industrial, domestic, agricultural and other customers, along with liberal rules for extending lines to new customers, are stimulating constant demands for enlargements of the company's plant and equipment. New capital must be invested in large amounts each year to provide for this growth, and to extend the advantages of the company's service throughout this wide-spread territory. Sale of these shares will supply new capital necessary for this sound and constructive investment.
