Sheriff Bauman of Heppner and Guy Barlow, the local deputy, arrested young Wigglesworth and another man who refused to give his name Saturday night as they were ready to enter the Tucker home with a load of modern "zythum" which was apparently taken off that night in preparation for the evening's festivities. The malefactors were brought before Justice of the Peace Blayden and fined. Competition is apparently getting keener for we thought the local manufac-

turers were keeping the trade as well supplied as present economic conditions permitted without newcomers entering the territory. The 30-day sentence was suspended but the \$50 fine was paid. Both the sheriff and his deputy have done good work in rounding up the "leggers" here, but there are still several left. An altercation at Irrigon between a sign painter from Hermiston and the young Oliver boy was brought into court here Saturday before Justice of the Peace Blayden. The lad's mother had the man arrested for kicking the boy, who, according to testimony had, used abusive and profane language to the painter who was fined \$5 for his part in the proceedings. Sentiment seemed to be that the lad needed a little discipline although not in that manner.

Farleys made a trip to Heppner one day last week.

The student body will have a mock trial Friday, May 8, at the auditorium. "Who Stole the Mince Pie from the H. E. C. on Saturday, Jan. 3?" is the deep, dark mystery that will be solved at this time. A film, "The Sky Hawk," will follow. This is a much-advertised picture and should be good. 25 and 35 cents is the charge.

Believe It, Or Not. A New York banker has figured out that if six copper coins recently unearthed, bearing the date of 600 years B C., had been placed at compound interest since coined, the returns would have been immense. How much? Well, it's past the power of comprehension. The American value of these coins was only 6 cents, yet they would have earned at compound interest during the past 2,500 years a ball of gold 62 times as large as this earth, so the New Yorker says.
