Fashion says "The briefer the suit the better." By far the smartest is the Jantzen Sunaire—a two piece swimming suit that affords a maximum exposure to the healthful sun rays with perfect modesty. The rage for Palm Beach, the Sunaire is the first choice of those who set the pace at every beach pool. Heightening its chic are its striking color contrasts.

## It may look good on paper, But how does it act on the road?

NOW if you were betting on a horse race you wouldn't place your bet basing it upon the length of the horse's legs or the depth of his chest or his standing height—you'd place your bet on performance—on what he had done in previous races.

IF you were betting on a boxing match you wouldn't go by the table of statistics on chest measurements, waist measurements, reach, etc. You'd want to know "Who has this man boxed and how did he come out?"

SO with tires—it isn't "How pretty are they?" but "How many miles will they run?"

NOW LISTEN — Goodyear has made and sold more tires each year for the past fifteen years than any other company.

LAST YEAR—with all their competition—Goodyear made over on-fifth—nearly one-fourth—of all the tires made in the United States.

THE NEXT TIME you go down the street look at the tires on the cars and note how many more Goodyears there are than any other make.

ASK your neighbors and friends what tire they prefer. A recent query sent out by the Bureau of Business Research of a large university to 205,000 people showed that 30.7% preferred Goodyears while the second choice showed only 13.8%.

SO the next time you peruse one of these trick comparisons just ask yourself, "If this is all true why is it that for the past fifteen years—and this year, too—millions more people ride on Goodyear tires than on any other kind?"

**THAT'S THE ONLY TIRE FACT YOU NEED TO KNOW.**
