FIRE FORCE NEEDED.

LAST week the fire alarm sounded on four successive days. Each time it sent chills through the spines of residents of the city. Only one of the fires, that which razed a residence on south Court street, resulted in property damage within the city.

Who knows but what the next alarm will summon our people to a fire in one of the fire-trap districts, which, if uncontrolled, might result in thousands of dollars loss in property damage.

Concensus of opinion, however, is that a little expert knowledge by men trained to respond more readily to the alarm would have resulted in saving much of the loss in the first instance.

Who knows but what the next alarm will summon our people to a fire in one of the fire-trap districts, which, if uncontrolled, might result in thousands of dollars loss in property damage.

PHILIP'S MISSIONARY LABORS Acts 8:26-40

Rev. Samuel D. Price, D. D.

It may be hard to be turned aside from present activities to undertake some new work but very often this change is a blessing in disguise.

He traveled south about 100 miles before any indication was revealed of the work for which he had left the company in Samara. Then a man was observed in a chariot who was reading aloud. Again there is a direction from the Holy Spirit and Philip accosts the treasurer of Candace, queen of the Ethiopians.

Again there was a call to proceed northward and the convert is left that a work of evangelizing may be followed as far northward as Caesarea. The Golden Text sets forth the activity that should be performed by every believer.

PIONEER O.S.C. DEANS HONORED

In recognition of "distinguished services and notable achievements" to Oregon, J. A. Bexell, (left) dean of commerce at Oregon State college, and Dr. A. B. Cordley, dean of agriculture, have been appointed deans emeritus of their respective schools by the state board of higher education.

adequate firefighting force would return tremendous dividends in the event of such a recurrence?

RADIO ADVERTISING.

WE WONDER if everybody is as tired of advertising over the radio as we are. We wonder if the people who are paying for radio advertising are getting their money's worth out of it.

In Russia we understand people cannot hear anything but propaganda through their radio sets. In France the government owns all the radio stations but leases time on the air to advertisers who, we understand, do not make any very successful attempts at entertainment.

The last thing we want in America is any kind of government censorship. Freedom of speech and of the press is one of the fundamental principles of our democracy.

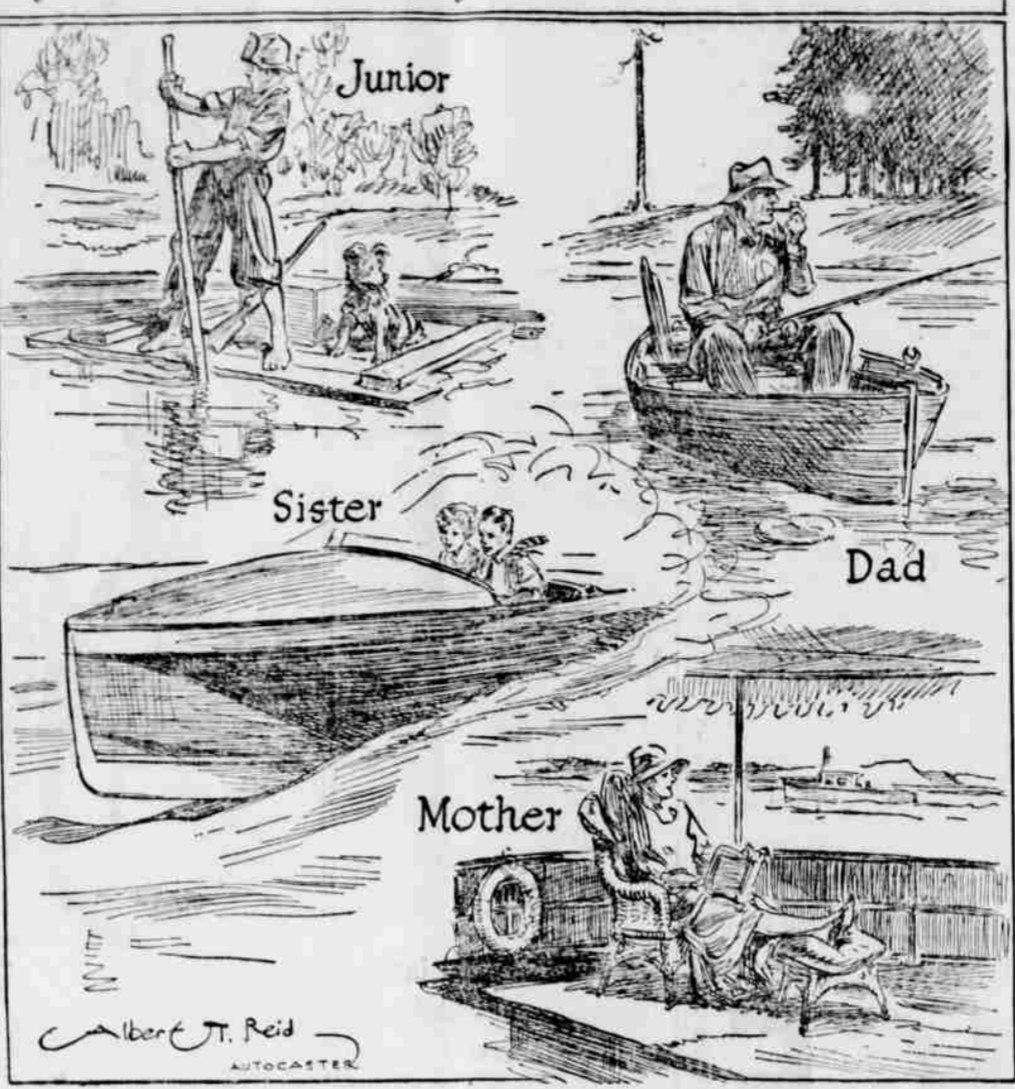

Probably, on the whole, our American system of letting advertisers pay for our entertainment is the best. We certainly get better entertainment over the radio than they do anywhere else.

THOSE EUROPEAN DEBTS.

THE principal impression which the international financial conferences make upon us is that the United States is for the first time since the war taking the part in international affairs which our country's position as the world's wealthiest and most prosperous nation demands of us.

International debts are just like all public debts, in that the promises of politicians to pay them are not always based upon the ability of the town, county, state or nation to pay.

If Each Could Choose a Craft

doing in London, and try to figure a way out, based upon Germany's proved and actual ability to pay.

W. C. T. U. NOTES.

MARY A. NOTSON, Reporter. British Columbia does not furnish much proof that the plan of William Randolph Hearst to finance a five-billion-dollar bond issue out of taxes to be levied upon liquors would be a success.

Under government control, in the province of Quebec, all kinds of liquors are sold in 204 cash and carry stores. Wine and beer are sold without limit in 708 hotels and restaurants.

The other provinces, except Prince Edward Island, show a similar record. Prince Edward Island has prohibition. The population is 88,615. Convictions for serious offenses number less than one-tenth the rate for Canada as a whole.

There has not been an execution in forty years. Divorces are almost unknown. There is no unemployment. There are twice as many people per square mile, four times as many cattle, and eight times as much poultry as in any other province.

THE FAMILY DOCTOR JOHN JOSEPH GAINES, M.D.

THE EVIDENCE

My readers may possibly wonder why I am so frequently denouncing the six o'clock dinner; this, when so many of our foremost citizens indulge the feast as a sort of triumph of civilization; and, when so many of our leading physicians and dieticians patronize it without saying anything about it.

(1) From a long study of aged men and women, I find the longest-lived to be those who are hearty breakfast-eaters, and who do not load the digestive tract at the evening meal.

(2) From a study of vital statistics, I find that six o'clock dinner devotees succumb to "heart disease" or cerebral haemorrhage, never later than the middle sixties.

(3) If I were to inject the expressed juice of the average six o'clock dinner into a patient's veins I feel sure I would kill him instantly!

ly! Well—the six o'clock glutton gets those juices into his veins more slowly, hence he is slower about dying of "heart disease" than he'd be with my intravenous injection.

(4) The tired body—the tired, half-exhausted nervous system cannot supply the necessary gastric and pancreatic fluids to digest a heavy six o'clock feed; hence the juices of the "gorge" are taken into the system by absorption, and in a shape that cannot be utilized in the repair of bodily tire—not all, nor half of it can be said to be fit.

(5) Hence, it is carried with the blood-current, an active poison unfit for the human systemic repair. Hence the eater does not want breakfast the next morning—has a feeble appetite at noon—but is ready for the disappointing overfeed at the following six o'clock. The very arteries of the heart become poisoned slowly. The vessels of the brain give way in their walls. Short breath and apoplectic symptoms develop slowly, insidiously. They finally kill.

roads, more postoffices, more telegraph lines, more churches, and more money in the savings banks per capita than any other Canadian province. The police force of the entire province consists of thirteen men.

O.S.C. Discovers Another Animal Disease Immunity

With the discovery of a new hyper-immune serum which will protect dogs from the dreaded salmon poisoning disease which has long been a serious problem to the livestock industry of the coastal regions, Oregon State college experiment station has developed its third immunity—a record believed to be unequalled by any station in the United States.

At the experiment station found that the deadly disease caused in dogs, foxes or coyotes from eating salmon and sometimes trout, was carried by a parasite in the fish. The life cycle and habits of the fluke were studied, and many experiments conducted in the search for a means of controlling the disease.

In announcing the discovery of the new serum before a group of 100 veterinarians from Oregon, Washington and British Columbia gathered at the college for their annual convention last week, the experiment station veterinarians pointed out that salmon poisoning may also be transmitted by a blood injection, a fact which was used as the basis for the development of the immunizing serum. This is said to be the first time in the history of medical science that a fluke has been found to act as a carrier for an infectious disease.

The effectiveness of the new serum is hereby given that by virtue of an execution issued out of the Circuit Court of the State of Oregon for Morrow County to me directed and delivered upon a judgment and decree and order of sale rendered in said court on the 31st day of July, 1931, in favor of The Federal Land Bank of Spokane, a corporation, and against J. D. Moyers and Flora Moyers, husband and wife, in the suit therein pending wherein said The Federal Land Bank of Spokane is plaintiff, and the J. D. Moyers and Flora Moyers, husband and wife, and Hardman National Farm Loan Association, a corporation, are defendants, for the sum of \$156.16, with interest at the rate of 8 per cent per annum from the 1st day of April, 1931, and the sum of \$19.00, abstract charges; and all of said sums amounting in the aggregate to \$428.13, together with interest thereon at 8 per cent per annum from the date of entering the decree until paid; and the further sum of \$235.00, together with interest thereon at the rate of 5 1/2 per cent per annum from the 1st day of April, 1931, and the further sum of \$15.70, plaintiff's costs and disbursements in this suit, which said decree and judgment and order of sale have been docketed and enrolled in the office of the Clerk of said Court, and in and by which said judgment, decree and order of sale it was directed that the hereinbefore described real property in Morrow County, Oregon, together with the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining, and also all of the estate, right and interest of said defendants in and to the same, be sold by the Sheriff of Morrow County, Oregon, to satisfy said judgment and all costs.

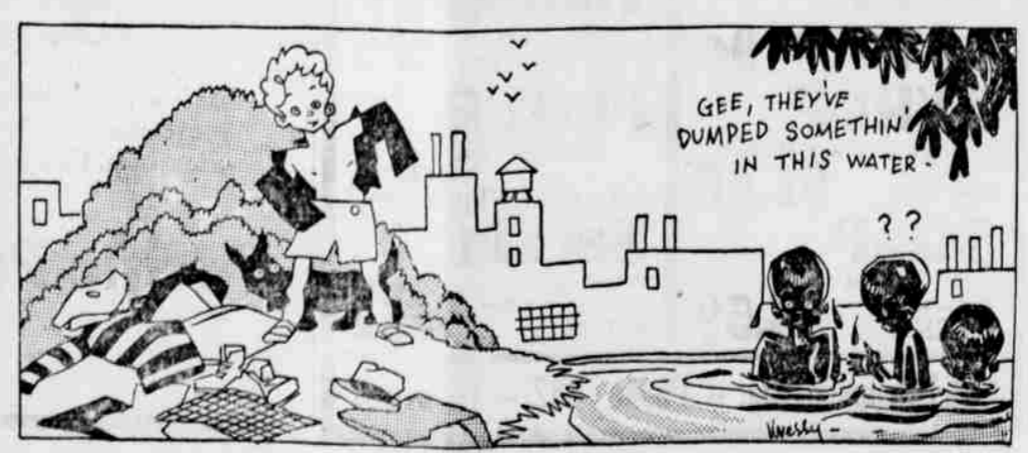

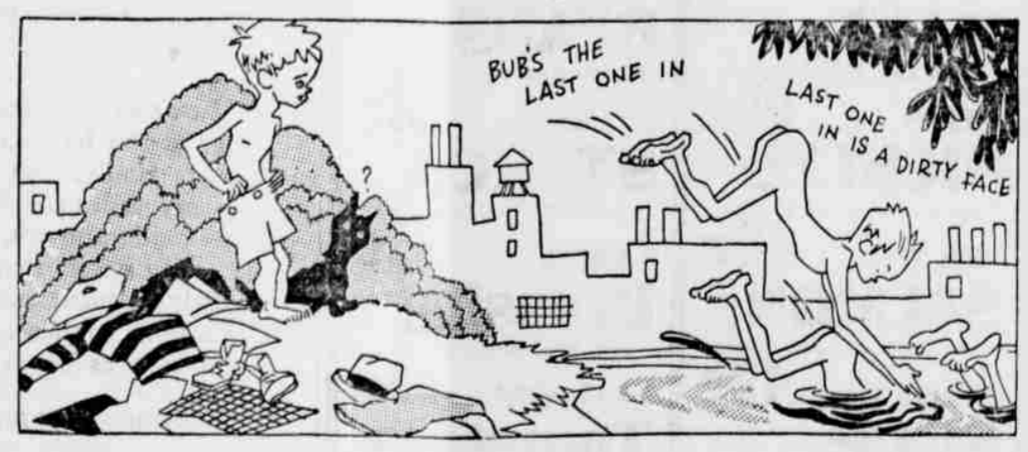

Therefore, I will, on the 5th day of September, 1931, at the hour of two o'clock in the afternoon of said day, at the front door of the courthouse in the City of Heppner, Morrow County, Oregon, sell all the right, title and interest which the said defendants, or either of them, had on the 1st day of October, 1929, or since then have acquired or now have, in and to the following described premises situate in Morrow County, State of Oregon, to-wit: The South Half of Section Thirty-six, in Township One South, Range Twenty-six, East of the Willamette Meridian, Morrow County, State of Oregon, together with the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining; and also all of the right, title and interest of said defendants in and to the same; said lands to be sold at public auction to the highest bidder for cash in hand, at 10 a. m., Saturday, August 22, 1931, unless the said animal shall have been redeemed by the owner thereof before said date. Said animal is described as follows: One white horse, aged 8 or 9 years, roached mane, no visible brand.

Noticed this 4th day of August, 1931. C. J. D. BAUMAN, Sheriff of Morrow County, Oregon.

NOTICE OF SALE OF ANIMAL. um in producing immunity to the disease has been definitely established through experiments in different sections of western Oregon, according to Dr. B. T. Simms, head of the veterinary department at the college. No means of curing salmon poisoning after it has been found, however, and the study will be continued with this end in view.

RETURNS FROM CONVENTION.

Dr. A. D. McMurdo, who returned home Sunday evening from the convention of the Eastern Oregon District Medical Association, held at Wallowa Lake on Saturday, reported a wonderful meeting. It was one of the very best so far held, and the treatment of guests, and the surroundings were superlative, he said. Dr. McMurdo was president of the association for the year just closed.

Only one thing happened to mar the smoothness and dispatch of the proceedings, he said. Dr. C. J. Bartlett cracked up his plane in flying over from Baker, accompanied by Drs. Higgins and Gordon, also of Baker. Luckily there were no serious injuries, all escaping unhurt with the exception of Dr. Gordon who received slight bruises. The plane landed in a clump of willows which broke the fall.

Paul M. Gemmill returned home last Thursday from Portland where he received treatment for three weeks for injuries to his spine, at the veterans' hospital. His condition was not improved and he has been bedfast since, suffering much pain.
