PROPHETS

WE CANNOT think of anything quite so foolish as trying to predict what will happen next. We predict that there will be either a Democrat or a Republican elected to the Presidency next year, and we don't believe anybody can hit it any closer than that, as politics look now.

We have our own opinions as to what is going to happen, but we try to keep them to ourselves. When it comes to predicting facts, we are sure of only a very few things.

We predict, for example, that there will be a lot more cold weather than warm weather between now and Spring. We feel reasonably safe on that point.

We predict that there will be either a Democrat or a Republican elected to the Presidency next year, and we don't believe anybody can hit it any closer than that, as politics look now.

We won't take a chance on predicting whether Henry Ford is going to bring out a new car for 1932 or not, but we feel safe in prophesying that if he does he'll sell a lot of them.

We wish we knew whether the price of wheat and cotton were going up or down. We don't, but we predict that whichever way farm prices go, the political farmers will still be asking Uncle Sam to help them out.

There are a few other things still in the future of which we are certain. Water will continue to run down hill, the sun will rise daily in the East as usual, and there will be just about as many fools on wheels breaking their own necks and others' next year as there were this year.

We can't tell whether or women are going to wear their hair and their skirts long or short, but we feel certain that whatever any man says they are going to do, they'll do the opposite.

Outside of a few certainties like that, because upon the unchangeable laws of nature, human and otherwise, we don't set up to be any kind of prophet. But we do predict that almost everything will be different next year and succeeding years from what they are today.

It would be a pretty dull world seems to us, if anybody could tell what is going to happen next. What makes life interesting is the variety there is in it.

Sunday School Lesson

International Sunday School Lesson for October 11. PAUL IN PHILIPPI Acts 16:22-34; Philippians 4:4-7. Rev. Samuel D. Price, D. D.

Trouble seemed as natural for Paul as did preaching the gospel. A syndicate owned a slave girl who seemed to have the power of divination. The evil spirits in this maid showed their knowledge by declaring that "These men are servants of the most high God." But they kept calling out to the annoyance of Paul and the hindrance of his work.

One result was that the men who perchanced on humanity found that their chattel was worthless for soothsaying and started an uproar against these men who had part in freeing a life from slavery to an evil spirit. Racial and religious prejudice was stirred up to get back at Paul and Silas with the result that these good men were imprisoned.

But no dungeon could cut off their approach to the Throne. Though bleeding from the unjust beating and with feet fastened cruelly in the stocks, the spirits of these men reached unto God. They began with prayer because of the way in which God had permitted them to glorify Him in life and testimony. Soon they involuntarily broke forth into song and their fellow prisoners heard them. This was amazing enough but a still greater event followed in the earthquake which so shook the prison that all became free men.

When the keeper of the prison sensed the situation he was about to kill himself, thinking that all the prisoners had run away. Paul advises him that all can answer the roll call. The presence of God was recognized and the outcry made, "Sirs, what must I do to be saved?" The answer is the truth for today: "Believe on the Lord Jesus Christ. The Saviour was accepted forthwith and testimony was given in the rite of baptism. The new life was further expressed in the activity of penitence as the jailer tenderly washed the stripes of Paul and Silas and furnished them creature comforts.

we usually call it the Fall of the year.

It must be admitted that we don't have very much of a Spring season, in most parts of this country. We go from Winter smack into Summer. We don't understand what the English poets are talking about as they sing of Spring. But on these they go from Summer right into Winter, almost. There is none of that long-drawn-out season after harvest when the leaves are turning and falling and, in the North, at least, there is a touch of frost in the early morning and the sweet smell of fallen leaves and Nature taken on a coat of gorgeous color before shifting to the somber gray of Winter.

Fall is the season of play for the farmer. When the crops have been harvested and the Fall plowing done, there is a period before Winter sets in when hunting is at its best, when it is a pleasure to be out of doors with nothing of immediate importance to attend to. It is the season of relaxation after the heat and strain of the Summer, when folk can take time to sum up the result of the year's work and begin their plans for the next.

Thanksgiving Day, in most parts of this country, marks the end of Fall and the real beginning of Winter. Then we begin to look forward to Christmas and thence to next Spring. We hear travellers tell of countries where the seasons never change from one year's end to the other. It seems to us that half of the pleasure of life comes from the changing seasons, and from looking forward to the next change.
