ELECTRICITY.....

The New Helper on the Farm

What cheap and abundant electric power has done for the industrial worker and his family in the alleviation of drudgery and the betterment of living and economic conditions, it is now doing for the farmer.

It is lightening the load of physical toil and increasing the comfort and convenience of the farm home.

Just recall the farmers' wives of a few years ago—and many even today! The drudgery of washday over old washtubs! Then ironing, heating flat irons on the kitchen stove and then back and forth, back and forth, from stove to ironing board. Pumping water by hand. Cleaning and filling kerosene lamps. Butter produced only after grueling labor. But why continue!

How utterly this situation has been changed in the electrically equipped farms of today!

One wife is now needed where two and three were needed before. Hard physical toil was the reason.

Electrify Your Home and Farm. Electricity is the New Helper on the Farm.

Fletcher's CASTORIA

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.
