Wheat Climbs Steadily For Week at Portland

There was very little irregularity in the steady movement of wheat prices to higher levels during the past week, reports the Portland Grain exchange.

The grain trade, without exception, feels that prices have advanced too rapidly and that caution should be used to insure a healthy recovery of prices, rather than a speculative skyrocketing with a collapse later.

Wheat prices have doubled within a month at most interior points of the Pacific Northwest and there has been a greater tendency to sell by the interior this week and as this continues there will be more activity and a general unlimbering of credit and money.

Harvesting in Australia is now in full swing and yields are reported above expectations with considerable business worked to Japan. Argentina is shipping freely with total shipments of wheat and flour at least forty per cent over those

Indemnity+Prevention=Insurance

More than Indemnity

Your fire insurance dollar provides far more than you realize. Of course it protects you from financial loss in case of fire. But it does so much more that it ranks as one of the most effective dollars you spend.

Merely as indemnity, Stock Fire Insurance is one of the cheapest necessities. Its average rate has consistently declined for more than 20 years, until in 1930 it reached the lowest figure in all American fire insurance history.

STOCK FIRE INSURANCE

teaches better building practices—furnishes a service for the suppression of arson, another for the improvement of community fire defenses and conducts many general fire prevention activities, all of which have contributed to the reduction of fire waste and the loss of life by fire.
