"You needn't tell me — I know Camel is the fresh cigarette!"

Milder because they're fresh CAMELS are never parched or toasted!

FOLKS who smoke really fresh cigarettes made from choice sun-ripened tobaccos never have to give a thought to their throats. That's because such fresh cigarettes retain natural moisture — and are gratefully smooth, cool, throat-friendly, mild. Camels are the fresh cigarette — everyone knows that now — they're blended from the finest Turkish and mild Domestic tobaccos that money and skill can buy. We would never dream of parching or toasting

these choice sun-ripened tobaccos — that would only drive off or destroy the natural moisture that makes Camels fresh in nature's own mild way. The Camel Humidor Pack protects a fine cigarette fresh with natural moisture — it could do little or nothing to freshen a cigarette that is dried-out or factory-stale. If you smoke for pleasure, see for yourself what freshness means in mildness and flavor — switch to Camels for just one day — then leave them, if you can!

CAMELS Made FRESH — Kept FRESH

Don't remove the moisture-proof wrapping from your package of Camels after you open it. The Camel Humidor Pack is protection against perfume and powder odors, dust and germs. In offices and homes, even in the dry atmosphere of artificial heat, the Camel Humidor Pack delivers fresh Camels and keeps them right until the last one has been smoked
