The merchant who does a credit business naturally has full confidence in his customers when he "books" the account, but what a jolt he gets when his customer fails to pay as agreed—then what a "joyful feeling" when the tardy customer comes in with the money.

Made FRESH

never parched, never toasted

CAMELS are KEPT Fresh!

You probably know that heat is used in the treatment of all cigarette tobaccos.

But you know too that excessive heat can destroy freshness and fragrance.

That's why there could be no truly fresh cigarette except for scientifically developed methods of applying heat.

Reynolds is proud of having discovered and perfected methods for getting the

benefits of heat treatments and still avoiding ever parching or toasting.

With every assurance we tell you, Camels are truly fresh. They're made fresh—not parched or toasted—and then they're kept fresh in the Camel Humidor Pack.

If you wish to know why the swing to Camels is nationwide and steadily growing—switch to them for just one day—then leave them, if you can.

"You needn't tell me—I know Camel is the fresh cigarette!"

Don't remove the moisture-proof wrapping from your package of Camels after you open it. The Camel Humidor Pack is protection against sweat, dust and germs. In offices and homes, even in the dry atmosphere of artificial heat, the Camel Humidor Pack delivers fresh Camels and keeps them right until the last one has been smoked
