THE 18TH AMENDMENT.

Hood River, Ore., Dec. 6, 1932. To the Editor:

I have always been a strong supporter of the 18th amendment and still believe it carries with it the most reasonable solution of the whole liquor problem. I believe its adherents represent high ideals and as such will ever hold sacred any weapon for its defense. Truth and honor are written on its banner and to disturb it with any cheap substitute may lead to the destruction of the whole fabric. We cannot at this crisis afford to interfere with such an instrument of safety.

I am of the opinion the state referenda repeals are mainly gestures, intended to retard the prohibition cause. Of one thing we can be certain, any moral issue will never be settled until it is settled right, and every intelligent person ought to the liquor traffic is wrong.

What justification did the wet leaders have for wanting to change the Volstead law in this state, and help the violator when really they had no foundation on which to base their claims, and when there were so many other important issues involved, both national and international, than to keep the repeal of the prohibition law in action. It is a disgrace to the United States and I believe there will be influences in different directions to cripple, at least, these dangerous advances.

Sincerely, JULIA A. HUNT.

GERM-KILLERS

It seems to me that every quack in the country is exploiting some "antiseptic." Their radio verbiage is sickening with its repetition. Nevertheless people DO need anti-septics for emergency treatment not necessarily the nostrum of the fakir. Let's see:

The laborer "skins" his hand. . It may be a poisoned wound; he has no certain way of knowing, but he must play safe. He has a bottle of tincture of lodine,—maybe a little of tincture of lodine,—maybe a little of tincture of lodine,—maybe a little of tincture of lodine,—maybe and the little of lodine,—maybe and little little of lodine,—maybe and little of lodine,—maybe and little little of lodine,—maybe and little little of lodine,—maybe and little little of little tle of mercurochrome—quite likely a teaspoonful of carbolic acid or Lysol at the house. There are no better antiseptics. He may swab the abrasion with either drug in its commercial state, except the car-bolic acid, which he must reduce with water, one part to four. Prompt swabbing with the real antiseptic may preserve a limb-may-be life itself. One must not take

any chances. We find a skin eruption popping out. We figure on an antiseptic. Well, if pus is in the "breaking out," open and swab with peroxide of hydrogen. Everybody knows "peroxide." Then follow with a soothing ointment that protects the skin from further infection. One of the best ointments is calomel, twenty grains; oxide of zinc, sixty grains; white vaseline one ounce. Mix thoroughly. This is a good, serviceable ointment for any skin.

Bi-chloride of mercury is one of the best germicides known, in a solution of a grain to the ounce in distilled water. But, this MUST not be taken internally. It is very poisonous taken internally. To apply a blazing match to a wound is painful, but it beats nothing if you have nothing else with you, and are away from first aid.

"I AM A MAN WHICH AM A JEW," Paul said. We like to see a man proud of his nationality. Especially if he is a citizen of any nation in whose history, and nobler characteristics of its people, he may

have reason for pride. However, most of us have a touch of race prejudice. This has always been, and it looks as the it always will be; more or less of race prejudice between the different races of mankind. And yet there is scarcely a race to be found to which the world is not inaebted for some distinctive contribution to civilization Paul sensed this when he said am debtor both to Greeks and
