## O. S. C. Students to Make Bus Trip to World Fair

A motor bus trip to the Chicago world fair with most of their expenses paid in advance through their own activities, is the unusual experience to be begun the week of June 5 by 18 students in agricultural engineering at Oregon State college.

This group started to work on such a project more than a year ago and last season cleared \$300 raising a crop of field corn on rented land near Corvallis. The Oliver Farm Equipment company and the Caterpillar tractor company have added \$100 each to the fund, which with other cooperation permits the month long trip to be made at a cost of only \$10 for each student.

The students will be accompanied by two members of the staff, W. J. Gilmore and Clyde Walker. The party will go first to Purdue University, in Indiana, to attend the annual convention of the American Society of Agricultural Engineers, and will be at the world fair during engineering week.

Frank Leicht purchased a new Ford eight last Monday at the Hermiston Ford garage.

James Warner has been quite ill with intestinal flu the past ten days. W. L. Rutledge is suffering with an attack of rheumatism.

Mr. and Mrs. Earl Isom went to Imbler Saturday to visit relatives. They remained for Decoration Day exercises.

J. P. Conder gave an address at the community church Sunday.

A commercial club was organized Friday night.

## Commencement Program Notable One at O. S. C.

A notable program for alumni and parents of graduating seniors who go to Oregon State college for the events of Commencement week end June 2 to 5 has been announced by officials of the college.

Highlights of the schedule Saturday, June 3, will be alumni reunion events centered around the silver and golden jubilee classes of 1908 and 1883, the annual reception given by Chancellor and Mrs. W. J. Kerr to the graduating class, alumni and guests; and the alumni banquet at night to be addressed by Chancellor Kerr who will explain what the present system of higher education offers the youth of this state.

Phi Kappa Phi initiation and alumni breakfast will open the Sunday program followed by Baccalaureate service at which Dr. John Haynes Holmes of New York City will be the speaker.

The sixty-fourth annual graduation exercises will be held Monday morning at 10 o'clock when 486 degrees will be conferred, including 53 masters' degrees. This is the largest class of graduate students to date. Speaker at the commencement exercises will be Dr. Melvin Gordon Neale, president of the University of Idaho.

*Henry Ford*  
*Dearborn, Mich.*

May 22, 1933

I suppose that I may claim to be the first Ford Dealer. I not only made cars, but sold them and frequently delivered them myself.

The "drive away" is not new; often I have driven cars from Detroit to towns in Ohio or Indiana or Michigan to make delivery.

There were no good roads in those days, and the people where I drove had never seen a motor car before.

My first really enthusiastic customers were Country Doctors. They were the first to realize the value of dependable transportation to a widely scattered practice.

Even today I occasionally hear from some of those first Ford users. We had to teach local mechanics how to care for the cars. That is how Ford Service began, which is now found everywhere in the world.

We believed from the beginning that a sale does not complete our transaction with our customer — it creates upon us an obligation to see that our customer's car gives him service. Ford Dealers know their duty to the public in this respect.

I can say of Ford Dealers generally that they have been and are men of character and standing in their communities. Most of them have been with us many years, which indicates that we agree on basic business principles. The Company provides that the methods used to sell the Ford car are consistent with the self-respect of the Dealers who handle it.

The present Ford V-8 is the peak of our 30 years experience. We have never made a better car. Its eight-cylinder engine is powerful and smooth running. The car is admittedly very good looking and has comfortable riding qualities. It is economical in operation because of advanced engine design and low car weight.

It is the fastest, roomiest and most powerful car we have ever built.

*Henry Ford*
