Official Paper for Morrow County

WE'VE TURNED THE CORNER. FOR three years now people have been saying optimistically that Prosperity is "just around the corner."

We have turned so many corners in looking for it that most of us found ourselves right back where we started from. For no sooner were economic conditions safely out of one tight corner than something new occurred to send business into another corner.

This time, however, it seems increasingly clear that there are no more serious corners in sight. We have turned the last one and before us lies the open road to Prosperity.

We shall encounter some curves, to be sure. The road is not yet as smooth and level as we believe it will be later on, and there may be a few collisions. There are still upgrades to be climbed, but, if we may be pardoned for mixing metaphors into a sort of verbal hash, the old bus is hitting on all sixteen cyl-all of our present activity in forinders and if we don't run out of eign affairs has any other purpose gas we're in shape to take any hill than to try to untangle the mess on high.

In all seriousness, there is no guesswork about the reports that from the fact that European naome in from every part of the United States. Business is picking up. One after another of the big industries is coming through with reincreased orders, more men put back to work, prices firm-ing up, all of the essentials of real osperity. We know that prices a lot of our raw materials every of staple farm commodities are year. rising and agriculture once more has a chance to make a living and something more for those who follow it.

The best thing about this whole situation is that people don't look skeptical when anyone says that things are better. Instead, the other fellow agrees with you. We have passed beyond the region of hope into the realm of faith, faith in the future, generally shared by everybody.

It won't be long, now.

AMERICA FIRST. FROM what we read and hear about what is being planned in can't or don't produce. Washington, it looks to us as if the Administration were trying to put the United States in a position where this country can run along

independently of the rest of the which prevents foreign countries In all seriousness, there is no from paying what they owe us,

tions have been spending money on competitive armaments instead of paying their debts. Much of the rest of our troubles can be traced to our long-time habit of relying

That habit grew upon us when w Prices going up were a debtor nation, and had to ship wheat and cotton and tobacco It isn't going to be long before and such to pay our foreign debts. The shoe is on the other foot now the prices of everything will be So long as Europe can't pay what she already owes us, it would be end for consumers, excent that foolish to expect her to take any more of our goods and pay for them. Instead, we have got to take more of her goods. The only way nations ever have paid debts to produce. each other is the way we used to

pay, in trade goods. No American could object if our foreign debtors were to pay us in coffee, or rubber, or tea, or cocoa, or silk or such-like things that we
