Briggs, Mrs. Joseph Pope, Mrs. Alice Adkins, Miss Ophelia Briggs and Miss Lucille Moyer, had the pleasure of an overnight visit with a former Heppner woman, Mrs. Birdie Maddock Jordan, at Maryhill, Wash. Mrs. Jordan is a daughter of the late Sheriff Maddock of Umatilla county, who was killed by Hank Vaughn, the notorious outlaw of the early days of this country. Mr. Maddock was sheriff when Morrow county was still a part of Umatilla county. Mrs. Jordan and Mrs. Briggs were girls together here.

On the way down Mr. Cohn came upon a bunch of cattle in the road unexpectedly and in trying to avoid them was forced off the road. He was not able to miss them altogether and one of the cows hit the front and rear fenders on the right side of the car, denting them quite badly. They were able to get back on the road and proceeded to Hermiston.

ACREAGE AND PRODUCTION STATEMENTS

Wheat Production and Acreage Statements

Wheat Production and Acreage Statements of Members of the Wheat Production Control Association of Morrow County, State of Oregon

The following is a statement of the production and acreages of wheat in the years 1929, 1930, 1931, 1932 and planted acreage for 1933 of producers of Morrow County, who have submitted applications for farm allotments. This publication is made in accordance with the regulations of the Agricultural Adjustment Administration. It is made so that a check may be made on all statement claims, and so that reports may be made to the County Wheat Committee and the association on any inaccuracies which may appear in the statements.

The allotment for this county has been definitely calculated from official records of the U. S. Department of Agriculture and is 1,065 bushels. This is the total allotment for the county.

Therefore, if any farmer receives a greater allotment than his past production warrants, he is thus depriving other farmers in this county of their just share.

Total production figures of those who apply for contracts together with those who do not must equal the total production as shown by the records of the U. S. Department of Agriculture. If the county totals are greater than the official totals, it will be necessary to make a downward adjustment.

Any person may make a confidential report of his acreage and production, which he believes to be inaccurate. Such reports should be made to the community or county committee either in writing or verbally. The reports will be strictly confidential. A record of such statements are said to be inaccurate will need to prove his production figures.

Farmers have been asked to furnish evidence of production and enter same such as contracts, certificates of sale, certificates of other records and receipts. Satisfactory evidence will be required of any farmer whose statement is questioned.

The following statements have been submitted to us to show acreage. "Acre" represents acres planted to harvest and "bushels" represents bushels harvested. The "four-year average" represents production from 1929-1932. Farmers should refer any questions regarding this publication to their community committee or to the County Allotment Committee.
