#### SHORT AND SNAPPY.

The folks who dump their rubbish in conspicuous places, are doing everything possible to prove that their home has no taste.

The higher men climb, the longer their working day. And any young man with a streak of idleness in him may better make up his mind at the beginning that mediocrity will be his lot. Without immense, sustaining effort, he will not climb high. And even though fortune or chance were to lift him high, he would not stay there. For to keep at the top is harder almost than to get there. There are no office hours for leaders.—Cardinal Gibbons.

For this reason, perhaps a change in the present system would be advisable. There are several methods known; one might be to have students list the types of books they enjoy reading, then have them select books from a list of good ones fled that they enjoy.

Do you students realize the re-
