A NEW YEAR.

LIKE a new-born babe looked at by a fond parent, each new year is viewed with an eye to its possibilities at various stages throughout its life. One likes to look forward to its spring, when its blitheness and gayness will bring joy and happiness, when the buds will bulge with growth and break forth in beautiful blossoms. Then the summer when the long working days and the sun's ripening rays bring anticipation of the rich crops to be harvested in the fall. And the winter, with all tasks well completed and the larder well stored, to contemplate on the gray serenity of the landscape and the successes of the seasons ago.

Would that all the battles in 1934 would end in triumph and victory. But some must lose while others win. Life is like that. Should every venture end in success, the winter would be serene, indeed, no matter what woe in the wind, or how lashing the blizzard's chill.

Why Hospitals Use a Liquid Laxative

Hospitals and doctors have always used liquid laxatives. And the public is fast returning to laxatives in liquid form. Do you know the reasons? The dose of a liquid laxative can be measured. The action can be controlled. It forms no habit; you need not take a "double dose" a day or two later. Nor will a mild liquid laxative irritate the kidneys.
