A Good Place to be "It is good for us to be here," Matt. 17-4.

The place referred to was the Mount of Transfiguration. It was here that Peter, James and John witnessed the transfiguration of Jesus, and beheld His real glory.

And Peter, James and John were from Heaven—Moses and Elijah. Besides, there were visitants permitted to look upon these glorified ones.

No wonder Peter exclaimed, "It is good for us to be here."

However, they did not, and they could not, remain there permanently. Back to the valley they must go, to face the tasks there awaiting them.

To face there the trials and minister to the needs of the valley, which means suffering, and sorrow and sin and woe. Yes, at the base of the Mount of Transfiguration lies the valley of human needs to be met and ministered unto.

The moments on the Mount are times of great joy, when new courage and faith and hope are the lot of the Christian who ascends the Mount. And, tho we may not stay on the Mount, we may take back to the valley with us all the God-given impetus of the time spent on the Mount. We can carry its glory back to the valley with us, and we go back with renewed hope and courage, inspired by the great visions of the Mount. God help the man or woman who has never had the privilege of a time on the Mount of Transfiguration.

Do you have a Church home? If not, we invite you to come and test the welcome of this friendly Church. Our Bible School is a "GOOD PLACE TO BE." Our Church is a "GOOD PLACE TO BE."

In the Old World--- when a man does something exceptional, or of particular advantage to humanity, they make him a Knight or something. But over here, we merely say: "That's fine! What else have you got?" Consider CURLEE CLOTHES for instance. For more than thirty years the House of Curlee has been making STYLISH CLOTHES for men. Giving more genuine value each and every year. So we've sort of fallen into the habit of saying: "What has CURLEE got this season?" Now the question is answered! The cases have come, bringing CURLEE CLOTHES for Fall and Winter, and honestly they're wonderful. You'll understand the real meaning of the word STYLE when you see these SUITS and TOPCOATS for men like yourself—who KNOW value! This then, is your personal invitation. Carpenter to be Market Extension Man at OSC

Paul Carpenter, for eight years extension specialist in agricultural economics at Montana State college, has been appointed to a similar position at Oregon State college, where he will succeed George O. Gatlin, resigned, as extension specialist in cooperative marketing.

Carpenter is already well known in many parts of Oregon having served both east and west of the mountains as county agent. He was for two years county agent in Polk county, and was then transferred to Baker county, serving for three years.

Born and reared on a farm in Minnesota and later trained in economics in the university of that state, Carpenter has had wide experience and outstanding success in the practical phases of the marketing problem, say extension officials at O. S. C. He was for three years manager of a cooperative dairy association.

"Carpenter is unusually qualified by training, experience and personality to fill this important position in Oregon," says E. L. Potter, head of the division of agricultural economics at O. S. C. "He has been outstandingly successful in this field in Montana."

The new appointee will be unable to take over the Oregon position until about the middle of November.

Deluge of Replies Shows Pulling Power of Press

The "pulling power" of the Oregon country press, as well as current interest in mining, was recently demonstrated by the results of a little news item sent to the weeklies and out-state dailies by the college news service at O. S. C.

This item announced that J. H. Batcheller, professor of mining and secretary of the state mining board, had prepared a mimeograph circular giving directions for identifying minerals found in Oregon, which would be sent free to anyone sending postage.

Within a few days from the time the story was printed Professor Batcheller began receiving a deluge of requests, some times at the rate of 30 or 40 a day. Within a week or so he had sent out about 300 circulars and the requests were still coming in. He said he was almost embarrassed by the response as he was able to mail so many at a time that he didn't need to use the full amount of postage sent in!

"The majority of requests came from out-of-the-way places and apparently from prospectors who have small resources and are consequently not in a position to pay for elaborate books," said Professor Batcheller.
