

# Local Happenings

Mr. and Mrs. Vawter Crawford returned home Monday from Joseph where they motored on Saturday with their son-in-law and daughter, Mr. and Mrs. Everett Hayes and children. The party returned Friday from Portland where Leland, young son of the Hayes', underwent an examination for an injured hip at the Shrine hospital. While the injury, received in a fall from a hayloft, was pronounced as permanent, it was not believed that it would seriously handicap use of the boy's leg.

Among Pendleton football fans taking in the game here Saturday between Heppner and Pendleton high schools were Dr. F. E. Farrior, former Heppner dentist, and Finley Graybeal, well known salesman who makes this territory regularly for a Pendleton wholesale concern. Mr. Graybeal's son is one of the star players of the Pendleton team, and a deal of paternal pride in his son's work was evidenced.

Ollie P. Ferguson and neighbor friend, Ralph Blake, of Gold Beach arrived in the city yesterday evening on business. Mr. Ferguson enjoying a visit with his brothers, Raymond and Gene, and many old time friends. He reports that his mother, Mrs. O. T. Ferguson, has been quite ill since returning to Gold Beach from here a short time ago.

John Turley who spent the summer in the high mountains with the D. O. Justus sheep left yesterday for Eugene where he will spend the winter. On the way he expected to take in the Pacific International Livestock exposition and also visit with John Hayes, pioneer Morrow county resident, in Portland.

Stephen Wehmeyer is visiting his parents, Mr. and Mrs. F. F. Wehmeyer, on furlough from the U. S. S. Maryland. Since last here a year ago Sailor Wehmeyer reports he has been much at sea. Asked if he accompanied the president to Hawaii, he replied, "No, I was taking in New York then."

Mrs. Dorris Mitchell and baby daughter who have been visiting for two weeks at the home of Mrs. Mitchell's parents, Mr. and Mrs. F. S. Parker, will return to their Joseph home tomorrow. Mr. Mitchell expected to arrive by car for them this evening.

Mrs. Garnet Barratt has been spending the week in Portland, and Mr. Barratt departed for the city last evening to join her as well as tend to business in connection with his position as vice-president of Pacific Cooperative Woolgrowers association.

Myron Huston, son of Mr. and Mrs. Guy Huston of Eight Mile, came into town Saturday with a 200-pound buck, killed in the Arbuckle section. It was young Huston's first deer, and a prize of which any hunter might well be proud.

Wrex Ellis, chairman of the Umatilla county republican central committee, accompanied Joe E. Dunne, republican candidate for governor, from Pendleton last Saturday evening for Mr. Dunne's public appearance here.

Tom J. Kreuger, master of the Malheur county Pomona grange, Portland, was in the city Saturday evening in company with Senator Joe E. Dunne, assisting in sponsoring the latter's candidacy for governor.

R. E. Bean, republican candidate for state senator, Morrow, Union and Umatilla counties, was over Saturday from his home at Free-water, meeting local voters. He is editor of the Free-water Times.

Mr. and Mrs. Oscar E. Peterson of the lone district were callers in the city, Tuesday. Their new farm residence being constructed by Bailey and Bobb, Heppner builders, is progressing nicely.

Mrs. Bert Kane, deputy county clerk, has proved herself an Amazon of no mean ability, bringing in a nice little forked horn buck as the result of Sunday's hunt.

Buck Bigbee and Leon Buller of Portland arrived in Heppner the end of the week to accompany L. Van Marter on a hunting trip out into the Greenhorns.

Mr. and Mrs. Henry Taylor have purchased the residence property of Dr. and Mrs. A. B. Gray at the corner of Main and Baltimore streets.

Dr. J. P. Stewart, Eye-Sight Specialist of Pendleton, will be at the HEPPNER HOTEL on WEDNESDAY, OCTOBER 11TH.

H. W. Grimm, C. W. Grimm and Harvey Walpole of Irrigon were in the city Monday attending the session of circuit court.

Born, to Mr. and Mrs. Herbert Cole at their home in this city last Saturday morning, a 6-pound daughter.

License to wed was issued last Thursday by Clerk Anderson to Elizabeth Bailey and William Johnson.

For rent—8-room house, garage, good basement, cookstove connected. Henry Taylor, city. 1tp

## 3 MILLIONS DUE IN AAA PAYMENTS

### Oregon Fight for Just Corn-Hog Quota Brings Big Increase Though Not All Asked.

Agricultural adjustment benefit payments in excess of \$3,000,000 are scheduled to be distributed to Oregon farmers during October and early November under provisions of the wheat and corn-hog adjustment programs, according to figures compiled by the Oregon Extension service. These payments, all made from the receipts from federal processing taxes, are to compensate Oregon growers for restricting their production in line with the national plan for these commodities.

The amount to be received under the corn-hog plan is more than twice as much as would have been due Oregon farmers under the original state production figure assigned by the bureau of crop estimates, though it is still below the figure considered just by many county allotment committees and the state college extension service.

The final base production figure allowed Oregon is 229,165 hogs for the total of all contracts. This figure compares with 108,250 total contract base given in the first estimate of 124,250 for the entire state including those hogs not under contract.

On the other hand it falls more than 20,000 hogs short of the 250,000 which the extension officials considered the absolute minimum which could just be assigned as Oregon's quota.

While the summer-long effort of the farmer leaders and extension service representatives to obtain a just quota for Oregon was not entirely successful, the outcome was a considerable gain even over what was declared to be the third and "final" quota of 213,000 hogs, points out F. L. Ballard, vice-director of the extension service.

Mr. Ballard adds that the troubles encountered in Oregon and a number of other states in carrying through the corn-hog program were not the fault of the plan itself, which was fundamentally sound, but arose from poor administration of the plan in this state by some representatives of the corn-hog section.

Corn-hog benefit payments authorized for Oregon now total \$859,365 of which two-fifths is payable at once. Under the original quota they would have been less than half that sum. Baker and Union are the first Oregon counties to receive their first payment checks.

Final 1933 wheat payments are estimated at \$834,800 in this state, while the 1934 wheat payment to be distributed immediately after the former, is estimated at \$1,829,427, making a total distribution for the next month or so of more than three million dollars in this state.

Meanwhile county corn-hog committees have completed arrangements for taking the referendum among contract signers on the twin questions of continuing some corn-hog plan for 1935 and of working out a single contract for all grains and livestock starting in 1936. Votes will be taken in one or two meetings in each county before October 18.

Additional purchases of drouth cattle, in excess of the original quotas which expired in September, have been authorized in Washington as a "tapering off" process. Oregon has been allotted \$63,374 in this cleanup buying which will purchase about 4500 head additional. State directors in charge of the cattle buying have been authorized to purchase cattle only from producers clearly unable to provide adequate feed supplies for their stock.

Oregon wheat farmers used nearly half of their contracted acres as additional fallow land, according to a survey made of 26 states including Oregon. The figures gathered by the AAA show for Oregon 46.6 per cent of the land left out of wheat used for fallow; 23.3 per cent was in new seedings for pasture or hay, slightly more than 20 per cent lay completely idle, and 8.3 per cent was used for food and feed production for home use. Less than 2 per cent was devoted to weed control and other miscellaneous uses.

**White Federation Grown**  
Heppner—B. H. Peck of Morrow county who planted White Federation wheat last year, reports a yield from this variety more than twice as large as he got from his Turkey wheat on land where drouth was severe. The White Federation was not certified, although it could have been if time had permitted, and Mr. Peck plans to certify next year, according to County Agent Joe Belanger. Some of the seed will be distributed to other farmers in the county this fall.

**Weed Killer Orders Pooled**  
Dallas—Ten Polk county farmers have pooled orders through the county agent's office during the past month for 1,100 pounds of sodium chlorate to be used in fall applications on Canada thistle.

**More Spray Used on Peaches**  
Medford—Following a successful marketing season for peaches in Jackson county, growers are showing an increased interest in caring for their orchards, reports L. P. Wilcox, county agent. More Bordeaux spray has been applied this fall for the control of peach blight than in any former season, he says.

**Editorial**  
Mr. Winter believes that the students of Heppner high school should have the advantage of a course in etiquette. Some phases of etiquette in which the sound thinkers of the school would appreciate instructions are: How to introduce people and how to act when introduced; the way to approach and address an older person, as well as one another; the impoliteness of combing hair, chewing gum and girls using compacts in the classroom; and how to act at a social function. In other words, we should desire to act more like the ladies and gentlemen that our fine school organization and community background makes possible.

**Athena Plays Here Friday**  
Next Friday at 3:00 o'clock the Heppner Fighting Irish will meet the Athena team in a battle to win. Last year Heppner defeated Athena 7-6 on their own field. This year we understand that Athena is going on the field undefeated. They have won or tied all of their games so far. Heppner has been defeated only once and we feel sure that Athena will have to show more pep and work harder than ever to win this game.

**Pep Rally Held**  
The pep rally held Friday to arouse the students' enthusiasm for the Pendleton game was well attended. Starting at the post office they serpented up Main street. At the intersection by Gilliam & Bisbee, they sang the school song and gave some yells. Forming an "H," they marched down Main street to the post office where they disbanded and went to the golf course to burn the letters.

**Frosh Initiation**  
The freshman initiation was held in the school gym Friday at 8:00 o'clock. As usual the frosh had to undergo various stunts including races, airplane rides and singing songs. After they were sworn in, the four high school classes were served refreshments in the basement of the schoolhouse.

**Benzine Ring Meets**  
The Benzine Ring met Thursday, October 4. La Verne Van Marter was initiated and a short program given. Next week Howard Bryant will be initiated into the Ring.

An etching, "The Star of Oregon," by W. R. McElwath, is being held by Mrs. Rodgers, county school superintendent, for the Heppner high school on condition that it be framed and hung in the school.

The Federal government is giving to schools all over the United States a number of pictures painted by artists under a Public Works of Art project which was for the purpose of stimulating the appreciation of fine arts.

The girls' glee club has begun practice on "Evangeline," a cantata, to be presented some time before Christmas.

**Grade School News**  
The first and second grades have become fairies and there is magic working in their midst. The queen is Doris Schaffer and the king is Frances Connor.

A Good Helpers club has recently been organized in the fifth grade.

## Why Liquid Laxatives are Back in Favor

The public is fast returning to the use of liquid laxatives. People have learned that the right dose of a properly prepared liquid laxative will bring a more natural movement without any discomfort at the time, or after.

The dose of a liquid laxative can be varied to suit the needs of the individual. The action can thus be regulated. A child is easily given the right dose. And mild liquid laxatives do not irritate the kidneys.

Doctors are generally agreed that senna is a natural laxative. It does not drain the system like the cathartics that leave you so thirsty. Dr. Caldwell's Syrup Pepsin is a liquid laxative which relies on senna for its laxative action. It gently helps the average person's constipated bowels until nature restores their regularity.

You can always get Dr. Caldwell's Syrup Pepsin at any drug store, ready for use.

They are now soliciting contributions for the Nome Relief fund.

## Pheasant Chicks Reared By Artificial Methods

A preliminary study of artificial hatching and brooding of pheasants, undertaken by the poultry department at Oregon State college at the request of and with the financial cooperation of the Oregon State Game commission, indicates that it is possible to hatch and rear pheasants successfully and economically by such methods, according to a progress report of the experimental work just issued.

Pheasant eggs were produced on the Eugene game farm and furnished by the game commission. They varied in age from one to 11 days when set. Hatching was done in three different types of incubators and handled the same as with hen eggs. Five hens also were set, to serve as a check on the machine hatching and brooding.

The brooding experiments were principally to determine the results upon growth and quality of baby pheasants from different rations. Six electric brooders were used, and temperatures slightly higher than usually recommended for ordinary chicks were maintained.

In the hatching experiments, chicks from the still-air incubators were of a quality equal to that of chicks hatched by natural methods. Need for further experimental work in determining the proper humidity conditions for best results was indicated.

Three different rations were tested. The pheasant chicks were found to develop much more satisfactorily on moist mash than on dry mash. It was also brought out that the standard college turkey ration did not produce as satisfactory growth with the baby pheasants as did the standard game farm ration or a third combination.

Although the work done so far indicates that pheasants can be reared successfully and economically by artificial methods, more experimental work is necessary to solve some of the problems in connection with their propagation, according to the report.

**Linn Farmers to Try Lime**  
Albany—To determine the reaction of alfalfa in Linn county to applications of lime, three tons of this material have been obtained from

## 10 Years Ago THIS WEEK

(From Gazette Times, Oct. 9, 1934)

E. G. Noble for mayor, L. E. Bisbee, M. D. Clark and Chas. Thomson for councilmen, announce candidacies for city election.

Edward E. Notson and Miss Mildred Smith married at Thorp, Wn., October 1.

Frank Gilliam motored over to Echo Sunday with other Heppner nimrods to shoot pheasants.

the Dallas lime plant by the Linn county agent, and will be distributed to about 20 farmers of the county for trials on one-fifth acre plots. Farmers who have already indicated a desire to cooperate in these trials are Clarence Brown, L. O. Weber and Walter Hense of Shedd; Vincent Grimes, Harrisburg; J. J. Underwood and Wilbur Evans of Halsey, and E. C. McClain of Lebanon.

## President Peavy Urges Economy; Warns Frats

Rigid economy as individuals and groups was strongly urged by President George W. Peavy in greeting his first incoming student body at the beginning of the year at Ore-

gon State college. Social fraternities which at OSC have already established records for low social costs were admonished to keep up that record.

Honorary societies set up to encourage high scholarship in the many branches of the college were given an even more pointed warning and told that they will have to justify their existence if they are to remain and collect initiation fees from financially overburdened students. President Peavy declared he prizes the traditions of democracy that belong to Oregon State and he intends to see that they are given all the support within his power.

The Gazette Times' Printing Service is complete. Try it.

## FREED OF CHARGE

Donald Heiker of Ione was found not guilty of the charge of reckless driving on which he was tried in the court of E. R. Huston, justice of the peace, Friday. The jury was Chas. W. Barlow, foreman, L. L. Gilliam, W. O. Bayless, Hanson Hughes and Robert Wightman. J. O. Turner was defendant's attorney.

## GIVE VENISON DINNER

Mr. and Mrs. Henry Aiken were hosts Friday evening to a group of friends for a venison dinner. Guests included Mr. and Mrs. Eb Hughes, Mr. and Mrs. Earl Eskelson, Mr. and Mrs. D. A. Wilson, Mr. and Mrs. Earl W. Gordon, Len L. Gilliam and Jasper Crawford.

\*FOG LIGHT\* is the danger-zone between seeing light and dim light. It is inadequate for reading or any severe visual work, yet it gives no clear warning to your eyes. Your vision is adjusted to it by harmful tension, which, if repeated for a prolonged period, results in eye strain. Only the Sight Meter detects "Fog Light" accurately and scientifically.

● Our abused eyes have never taken enough advantage of electricity and good electric lamps. We still work in light that is too bright, in light that glares, in dim light, and, worst of all, in that half-way-between light—"FOG LIGHT."

Your eyes won't tell you until it is too late—but the new Sight Meter will. Its sensitive needle measures light as quickly as you can wave the shadow of your finger over it. You can have a demonstration in your own

home—without cost or obligation—just by making an appointment with our local office. Our home lighting expert will call at your convenience and show you, as she tests light with the Sight Meter, how to rearrange your lighting for better seeing at work or play.

This is a Pacific Power & Light Co. service. It is not only free—we welcome your request for it. It is something that you will want to tell your friends about after you have had the Sight Meter demonstration.

**Protect Precious Eyes with this Study and Reading Lamp**

Here is a new scientific study and reading lamp that every school child should have. Its specifications are the result of an extensive survey by the Illuminating Engineering Society of America to obtain a perfect student lamp. There is an inverted open-top bowl of diffusing glass under the shade, which produces a correct combination of direct and indirect illumination. When placed on a table, all seated about this lamp see without eyestrain. After discovering how efficient this lamp is, every adult is going to want one by his or her favorite chair, too. The various models, from \$5.95 up, bulb included.
