**Saviour or Judge?**  
"The Father judgeth no man, but hath committed all judgment unto the Son." John 5-22.

A number of years ago, on a splendid fishing stream a man was trolling; he made a good catch and in the stress of the moment he overturned his boat and, as he could not swim, he was in grave danger of drowning when another boat rounded a bend of the stream; the occupant of the approaching boat saw the situation and slipping off his outer clothes made a dive and was able to rescue the drowning man as he was going down for the third time.

Years went by, and the nearly drowned fisherman was hailed into court on a serious charge; murder was fastened on him and there came a day when he must stand up and receive his sentence. All thru the trial he had been noticed to study the face of the presiding judge; then would look away and appear to be lost in deep thought. On the day when he was to be sentenced, he looked more carefully than ever at the judge; and then of a sudden, he cried out: "At last I know; Judge do you not remember me? I am the man whom you saved from drowning years ago; O' Judge, save me now!" The judge looked the man straight in the eyes and said: "Sir, I am sorry; you have had a fair and impartial trial; you have been proven guilty of the crime for which you were arrested; the law leaves me no alternative. That day, years ago, I was your SAVIOUR; TODAY I AM YOUR JUDGE."

What a truth! And we face the same situation, every one of us, now. The Christ who gave Himself gladly to save us for all eternity, while we are still this side of the grave, will one day sit in judgment on us every one. What will be our situation then? The life we live here and now, whether sinner or Christian, tells what our lot will be in the day of eternal judgment.

If you have not a Church home, then we most cordially invite you to come and worship with us. Be here for the Bible School hour, and then attend the services of worship. You will be made to feel at home. For the coming Lord's Day the sermon topics are: For the morning service, "Loyalty." For the evening service, "Never Failing Love."

## Egg Prices at Highest Point Since Nov. 1931

Egg prices are now the highest they have been since November, 1931, says a report on the poultry situation from the office of the O. S. C. extension economist. The advance of the past month has been more than the usual seasonal advance and is the result of a rather sharp reduction in production generally throughout the United States.

The drought with its resulting high feed costs is reflected in an 11 per cent decrease in the number of layers in farm flocks on October 1 and a 3 per cent reduction in the number of eggs produced per 100 hens in flocks.

Poultry feed costs are still relatively high, says the report, but with the recent rapid advance of egg prices the relationship between feed costs and egg prices has become a little more favorable. Based on current prices, it required during September an average of 6.8 dozen eggs to purchase 100 pounds of standard poultry ration. During June, July and August it required more than eight dozen eggs to buy 100 pounds of feed. The figure for September 1933 was 6.1 compared with a September average 1926 to 1930 of 5.7.

A dairy report shows that considerable improvement in milk production per cow has occurred, particularly in the central states, but that heavy culling and marketing of milk cows during recent months has left fewer milk cows on farms than a year ago. The decrease in the number of cows has more than offset the increase in production per cow so that total milk production in the United States on October 1 was about 2 per cent below that of a year previous.

Increased demand and shortage in production have boosted some seed prices to new high levels. A report from Washington says that when timothy seed reached \$16.80 a hundred recently it established a new all-time record. In Oregon clover seed is selling at higher prices than at any time since the start of the depression. In the middle of October Chicago dealers were quoting country-run red clover at \$19 a hundred, and alsike at from \$17 to \$25.50. These are the highest prices since the fall of 1929.

**Why Doctors Favor a Liquid Laxative**

A doctor will tell you that the careless use of strong laxatives may do more harm than good.

Harsh laxatives often drain the system, weaken the bowel muscles, and even affect the liver and kidneys.

Fortunately, the public is fast returning to laxatives in liquid form. The dose of a liquid laxative can be measured. The action can thus be regulated to suit individual need. It forms no habit; you needn't take a "double dose" a day or two later.

Dr. Caldwell's Syrup Pepsin gently helps the average person's bowels while nature is restoring their regularity. Why not try it? Some pill or tablet may be more convenient to carry. But there is little "convenience" in any cathartic which is taken so frequently, you must carry it with you, wherever you go!

Its very taste tells you Dr. Caldwell's Syrup Pepsin is wholesome. A delightful taste, and delightful action. Safe for expectant mothers, and children. At all druggists, ready for use, in big bottles.

## Let's Quit Killing

Automobile accidents, injuries and killings continued to increase during September, according to reports issued from the secretary of state's office and it now appears that the record for the whole of 1934 will far exceed that of 1933, with many more persons dead and maimed from accidents caused mainly by carelessness and failure to comply with traffic regulations.

During September 24 persons were killed in traffic accidents this year as compared to 16 last year; 496 persons were injured this year and 402 in 1933; there were 1825 accidents this year and 1602 in 1933. Totals for the first nine months of 1934 are as follows: 14,893 accidents; 218 deaths; 3,564 injuries. For the same period of 1933, totals were 13,748 accidents with 172 deaths and 2,958 injuries.

In Morrow county during September of this year there were 8 accidents, one injury and no deaths as compared to 6 accidents, no injuries and no deaths in September, 1933.

Sponsors of the "Let's Quit Killing" safety drive pointed out this week that unless motorists and pedestrians alike use more care in driving and walking, with closer observance of traffic regulations, the present rate of increase in auto accidents will result in staggering casualty lists.

Drunken driving is the major accident cause selected for attention during the current two-week period of the drive. Traffic experts report that while accidents from this cause are not as numerous as those from other violations, they usually are more serious in results, because the drunken driver is physically handicapped in that it takes him longer, after perceiving an emergency, to apply his brakes or turn his car, than it takes the sober driver. This, in addition to the chance-taking frame of mind brought on by intoxication, is what makes the drunken driver such a serious menace, experts declare.

Voters who have not yet made up their minds on candidates and measures will find a lot of helpful information in the official pamphlets which are now being mailed out by the state department. The only trouble is that the pamphlet presents the claims of all the major candidates and both sides of the three measures to appear on the November ballot so that most voters after digesting its contents will be as much at sea as they were before reading it. Between 435,000 and 450,000 copies of the pamphlet will be mailed out depending upon the new registrations which are now being compiled.
