BOARDMAN

The Yuletide spirit was ushered into this community on Thursday evening, when the community Christmas program was presented to the public in the school gymnasium. The room was beautifully decorated. A very large tree stood against the north wall, trimmed in all the Christmas splendor. A unique fireplace was in the center of the wall and to the right of it the vested high school choir was seated, with Mary and Joseph and the manger in the foreground. The program, which was very interesting and well given, was divided into three divisions: The Nativity of Christmas, showing Mary and Joseph at the manger and the Christ Child by the Shepherds and Kings. Esther Brown sang "Brahm's Lullaby" and during the tableaux the choir sang Christmas songs; the old English custom of Christmas was explained by Rev. Thomas, and was portrayed by the bringing of the Yule log by the lumber men, and placing it in the fireplace, the board's head, the burning raisins, the wassail; the Modern Christmas consisted of songs by the choir, recitation by Stanton Hadley, solo, Mrs. T. E. Hunt; song, "Jingle Bells," by the children, and the entrance of Santa Claus. After the program treats of candy, nuts, popcorn balls and oranges and a cup of wassail was given to each person.

U. O. Students Aided By U. S. Work Funds

University of Oregon, Eugene, Dec. 26.—Some 275 students at the University of Oregon, in common with thousands in other institutions throughout the United States, will be back in school January 2 as a result of the grant of federal funds which will give them part time employment. It was announced here by Dr. Earl M. Pallett, executive secretary.

This number is approximately the same as were assigned federal aid work during the term just ended. The monthly allotment to the university of \$3,525 per month is expected to remain the same also.

The work, which is allotted only to students who could not otherwise attend the institution, has also served as a decided stimulus to scholarship, for jobs for the coming term will be reassigned only to students who have made a good record in all studies.

While typing and clerical work provide most of the places for students, many are engaged on unusual and interesting projects. One student, apt at illustrating, is making a number of anthropological drawings for a research project of one of the professors. A group is engaged in assisting in a research project that involves psychology and music.

The students are distributed all over the campus, with every de-

partment having at least one. A crew under the direction of gardeners takes care of the lawn, and does landscape gardening. Assignment of work is under the direction of Karl W. Onthank, dean of personnel, and a committee appointed by Dr. C. V. Boyer, University president.

FORD PRESENTS ANOTHER ADVANCE IN TRUCK ENGINEERING

Forward Load Distribution

Obtained by mounting front springs ahead of axle and moving V-8 engine forward. This places more load ahead of rear axle, more weight on front end.

THE important fact to remember about the new Ford V-8 Truck for 1935 is not merely that it gives you new money-saving features—but that these features have been added to a truck whose economy, performance, stamina have already been proved.

For 1935, Ford gives you an entirely new development—Forward Load Distribution. This makes possible more uniform tire and brake wear—better brake action—improved operation and wear throughout the truck. In addition, with more space between the cab and rear axle, the 1935 Ford V-8 permits acute angle turns with full-width semi-trailers.

No matter how efficiently you are now doing your hauling, these and the other features of the 1935 Ford V-8 are important advantages to consider. They are matched by no other truck in America today, regardless of price.

Test this new Ford V-8 Truck yourself. Your nearest Ford dealer will let you do this... on your own job, under your own load, with your own driver!
