

HARDMAN

By LUCILLE FARRENS

Bountiful feasts and family reunions on Christmas day, vacation trips, the Christmas program, the appearance of Santa Claus at school and elsewhere made everyone aware that the Yuletide season has rolled around to us again.

Mr. and Mrs. Dick Steers and family were guests of Mrs. Ad Cannan and family on Christmas day.

Mr. and Mrs. B. H. Bleakman and family, Mr. and Mrs. Max Buschke and children, Mr. and Mrs. Sam McDaniel, Sr., and Mr. and Mrs. Carey Hastings and daughter enjoyed a family reunion and delicious dinner on Christmas day at the residence of Mr. and Mrs. Carey Hastings.

Mr. and Mrs. J. E. Swanson and daughter Eva drove to Salem on Monday to spend Christmas with Mr. and Mrs. Elmo McMillan.

Miss Mildred Smith of The Dalles is visiting her parents, Mr. and Mrs. Cole Smith. She will return to her work on Thursday.

Mr. and Mrs. Johnny Turner of Heppner were dinner guests of Mr. and Mrs. Frank Engelman.

home of Mr. and Mrs. Cole Smith. Mrs. Paul is a niece of Mrs. Smith. Charles Christenson will spend Christmas vacation at his home in Mill City.

the counties, 10 percent to roads and 7.5 percent to the state.

Numerous judicial reforms calculated to speed up court procedure will be recommended to the forthcoming legislative session by the committee of 21 lawyers and laymen appointed by Governor Meier to make a study of this subject.

John A. Cooter, Lincoln county representative who is slated to preside over the House at the forthcoming legislative session, has already become a temporary resident of Salem, having leased the home formerly occupied by Governor Pierce but more recently by Carl Gregg Doney, former president of Willamette university.

Roadside beer parlors are doomed under an order of the Liquor commission denying licenses to places whose principal business is the serving of drinks. In order to qualify for beer licenses these places must now go into the restaurant business when they may serve customers seated at tables.

John H. Carlin has been reappointed as a member of the state tax commission. His commission was signed by Governor Meier and Secretary of State Stadelman.

The state now has a \$5000 interest in a set of plans for a lot of new public buildings. The plans were drawn by a group of architects under authority of an act of the special session of 1933 when it was believed that Uncle Sam would finance a state building program through his Public Works administration.

DIVORCES GRANTED. Lloyd and Ruby Matteson, July 31. Jack and Lola Bell, Oct. 8. Harvey and Lenore Walpole, Oct. 8. Harold and Linda Becket, Oct. 8. Archie and Beulah Nichols, Oct. 8.

Oregon's Land Resources Discussed at Conference. A program of land planning such as is now being started nationally and in the various states, does not imply "Regimentation" in the sense that individuals will be told how to use their own land, it was brought out at the regional planning conference at Seattle in December. An effective planning program would mean that land will not be used in such a way as to be against the public interest.

Oregon's land planning problems are mostly tied up with management of public lands within the state, A. S. Burrier, state consultant from Oregon, told the conference. Burrier, who has been "borrowed" temporarily from the farm management department at Oregon State college, pointed out that 32 million acres, or almost exactly half of Oregon's area, are under public ownership.

About a million acres are under state ownership, and about three-quarters of a million acres are under county or municipal ownership, so that about 95 per cent of the land under public ownership is held by one branch or another of the federal government.

In instituting planned land use it is essential that the public agencies lead off in setting their own houses in order, Burrier believes. The federal managed lands, most of which are in forest reserves, are now in pretty good shape, he said. Passage of the Taylor grazing act and the withdrawal of all remaining parts of the public domain for entry for the present, are big forward steps, he said.

The state and county lands are not being administered in any orderly manner as a whole, he added. Most of these are unclassified, while the county lands especially, most of which have been taken for taxes, must under present laws be constantly offered for sale even though they are not suitable for further private operation.

About a third of the farm lands of the state have been covered by detailed surveys, and extension of such surveys is one of the basic needs of further planning work. FEIRA research programs are being completed in the state dealing with tax delinquency, land ownership, and part time farming practices and results. Field data are being assembled and analyses of results are being prepared.

Noted Newspapermen To Speak in Eugene. University of Oregon, Eugene, Dec. 26.—With leading newspapermen, not only of Oregon but of Washington and California as well, already lined up as speakers, and a number of present day problems of unusual interest for round table discussion, the annual Winter Newspaper Conference, to be held at the University of Oregon School of Journalism promises to be the most profitable and liveliest session in the organization's history, according to those in charge.

Dates of January 24, 25 and 26 have been set for the conference, and every day will be crammed with meetings of interest, it is announced. The program will hold interest for publishers of daily papers, weekly papers and combination shops.

Headlining the program will be Sol Lewis of Lynden, Washington, hailed as one of the most successful small town publishers in the entire country. He will be accompanied by several other Washington newspapermen who will take part in discussions.

Another outstanding newspaperman, Hugh C. Hall, publisher of the Hood River News, will be on the program for a talk. He will discuss a problem related to interests between town and country.

Of special interest will be the address to be delivered by A. L. Clawson, printing cost accountant of Oakland, California. He will lead the discussion Saturday afternoon, which will be devoted to prices under present conditions and codes.

A brilliant and successful newspaperman, now turned college

president, Dexter M. Keezer, president of Reed College, will also be on the program. He comes highly recommended as a speaker and is expected to have an interesting message for the newspaper group.

Friends of the late Hal E. Hoos, who before becoming secretary of state, was a prominent Oregon newspaperman, have donated a cup to be awarded to the best weekly published in towns of less than 1,000 population. Other trophy awards will be made at this time also.

Complete details of the event will be announced early in January, it is stated by Eric W. Allen, dean of the school of journalism.

Parent Training Need Is Noted by Educator. University of Oregon, Eugene, Dec. 26.—The next goal of adult education in the United States should be a two-fold program of training of parents in relation to their own children, it was declared here by Dr. C. V. Boyer, president of the University of Oregon, in an interview. Dr. Boyer, long a strong advocate of adult education, has closely studied this work not only in this country but abroad.

The program Dr. Boyer has in mind includes: first, classes for parents in elementary school subjects and those taught in high schools, so that parents denied educational opportunities in their youth can keep up with their children, and second, classes that will actually instruct the parent in taking care of the child and aiding him in development in learning, training and character.

"One of the tragedies of American life is that children go to grammar school, then high school and often on to college, and somewhere in the process far outstrip their parents in education," Dr. Boyer points out. "This often sets up a barrier between parent and child that leads to misunderstanding and actual grief. If parents would attempt to keep up with the children, a common bond would be established and a great deal of pleasure and mutual benefit derived from learning together."

Courses to aid parents in rearing their children properly would not need to have such high sounding names as "psychology of adolescence," or those similar, although courses in psychology should be included on the program, but could be simply "reading for the child," "choice of a profession," "home and school discipline," "problems of the home," and "child growth," Dr. Boyer stated. "The mere presentation to the parent of the material offered the child, together with the reasons therefor, would in itself be of immeasurable aid," Dr. Boyer points out.

Taking as a basis adult education work already available, and adding such courses as are needed, the program proposed by Dr. Boyer could be carried out under direction of some central agency. The necessary objective is that of definite, correlated parent education, he states.

State and local planning agencies, parent-teacher organizations, institutions of higher education and other civic groups should make this definite program one of their aims, Dr. Boyer believes.

OSC Winter Term Starts Jan. 2nd; Fall Total 2577. Corvallis—Students of Oregon State college now scattered through the West for the holiday season, will return January 2 for registration for the winter term, which continues through the first three months of the new year. Either new or old students can begin at the start of any term without serious disruption of previous course plans.

A total of 2577 students were enrolled for the first term, an increase of 32 percent compared with the fall term a year ago. Of these, 2263 came from the 36 Oregon counties, everyone of which was represented. Nineteen other states sent 187 students to the college, while three came from Alaska, two from Hawaii, six from Canada and one from China.

Seventeen Grasses Tried Tillamook—Primarily in an attempt to find a suitable grass that will thrive on the prairie soil and hill land of Tillamook county, grass nurseries have been established on the farms of B. W. Neilson, J. H. Steppa and F. H. Neilson, to test 17 varieties of grass. These include English rye, Italian rye, meadow fescue, chewing fescue, highland reed canary grass, Kentucky bluegrass, bulbous bluegrass, orchard grass, smooth brome, tall oat grass, timothy, red top, meadow foxtail, Astoria and Seaside bent. River bottom soil such as that on the F. H. Neilson farm, seems particularly adapted to rye grass and clover, according to Kenneth Carl, assistant county agent, but it is believed possible that a better mixture may be obtained by observing the growth of the varieties in the nursery on this farm.

Blue Grass Tried on Burns. Coquille—Seventeen Coos county farmers are cooperating with County Agent George H. Jenkins this year in demonstration trials to determine the value of Kentucky Blue grass in checking erosion on burned over hill lands in the county. About 5000 pounds of this seed was obtained by Mr. Jenkins from the federal government through the plant industries division at O. S. C., and distributed to farmers of the county.

Jenkins this year in demonstration trials to determine the value of Kentucky Blue grass in checking erosion on burned over hill lands in the county. About 5000 pounds of this seed was obtained by Mr. Jenkins from the federal government through the plant industries division at O. S. C., and distributed to farmers of the county.

Blue Grass Tried on Burns. Coquille—Seventeen Coos county farmers are cooperating with County Agent George H. Jenkins this year in demonstration trials to determine the value of Kentucky Blue grass in checking erosion on burned over hill lands in the county. About 5000 pounds of this seed was obtained by Mr. Jenkins from the federal government through the plant industries division at O. S. C., and distributed to farmers of the county.

Seventeen Grasses Tried Tillamook—Primarily in an attempt to find a suitable grass that will thrive on the prairie soil and hill land of Tillamook county, grass nurseries have been established on the farms of B. W. Neilson, J. H. Steppa and F. H. Neilson, to test 17 varieties of grass. These include English rye, Italian rye, meadow fescue, chewing fescue, highland reed canary grass, Kentucky bluegrass, bulbous bluegrass, orchard grass, smooth brome, tall oat grass, timothy, red top, meadow foxtail, Astoria and Seaside bent. River bottom soil such as that on the F. H. Neilson farm, seems particularly adapted to rye grass and clover, according to Kenneth Carl, assistant county agent, but it is believed possible that a better mixture may be obtained by observing the growth of the varieties in the nursery on this farm.
