Corn-Hog Plan Ready; Schoenfeld Promoted

With the arrival in Oregon of Ralph Moyer, regional representative of the corn-hog section, the 1935 campaign in this state will get under way soon, it is announced by the O. S. C. extension service.

A tentative schedule for holding the district meetings of the allotment committees to explain the new program has been drawn up. The various county agents will announce the definite dates as soon as they are confirmed. Most of these meetings are expected to be held the last week in January.

The important position of chairman of the board of directors in control of the four farm credit administration banks at Spokane has been given to W. A. Schoenfeld, dean and director of agriculture at Oregon State college, at an election just held.

Dean Schoenfeld has been a member of this board since reorganization of the farm credit administration under the plan provided in the Agricultural Adjustment act. The region served by the banks at Spokane includes the states of Oregon, Washington, Idaho and Montana.

Dean Schoenfeld has had extensive training and long experience in public service connected with agricultural economics. He has served as western representative and assistant chief of the United States bureau of agricultural economics, and represented the United States government for several years on special agricultural commissions abroad. He has been dean and director of agriculture at Oregon State college since 1931.

While northwest wheat growers are urging speed in disposing of the accumulated wheat surplus in this region, Chester C. Davis, administrator of the AAA, has just announced to middle western wheat growers that the present plan of wheat acreage control will in all probability be continued after the current three-year contracts expire at the end of 1935. This coincides with the opinion expressed by Geo. E. Farrell, chief of the wheat section, when he spoke to the Eastern Oregon Wheat league at Arlington recently.

Mr. Davis said that while there are some disadvantages in the present type of program, it will not be dropped until something better is presented. Regarding the single contract idea to cover several commodities, he said a practical plan of that sort would be welcomed, but up-to-date no improvement over the present type of program involving processing taxes and benefit payments to growers has been offered.

Friday night at the local gym Heppner scored its third straight victory by defeating Echo 25-16.

Heppner carried the offensive part throughout the first half and emerged leaders at the half 13-8. The second half was nearly a repetition of the first half with the home boys scoring twelve points to Echo's eight. Both teams played a good game throughout, making it a very interesting contest.

The Fighting Irish will journey to Boardman tomorrow evening to play the Boardman hoopers on their own floor. The Boardman team has been having a good season, and is expected to put up considerable opposition in the forthcoming game. Heppner has also piled up a number of victories, so the teams will be nearly an equal match. Editorial

The first semester ended last week amid mingled signs of relief and groan of pain. Many of the students were rewarded for their good work by exemptions from the semester exams. Some there were, however, who were awarded a stiff examination for having too many demerits. The seriousness of this matter is becoming more profound every day and if it is not headed more by the pupils, measures will have to be provided to cope with the situation.

The teachers are not monstrous gargoyles without any feeling that take fiendish delight in giving demerits. You do what you should in class and we rest assured that you will not have any demerits. Also it will be wise for people who are interested in sports and such to watch their step as six demerits bar you from school activities.

Assembly

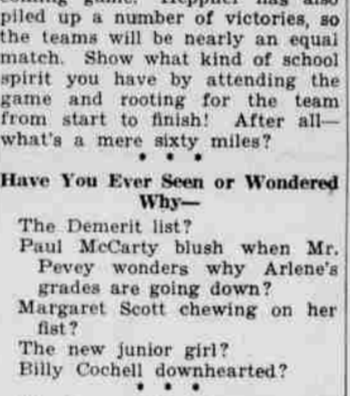

A general assembly was held Monday morning. The students were given their registration cards so they could register for the second semester. Mr. Bloom explained about registering and he also reminded us that everyone is starting with a clean slate so far as demerits are concerned.

Farm Profit Outlook Shows Good Prospect

Substantial improvement in the relationship between farm income and farm costs in Oregon is shown by data given in the annual report of the agricultural economics section of the Oregon agricultural extension service on the general outlook for farming in 1935 which has just been released for distribution through the offices of the county agricultural agents.

"Farm income from sales and adjustment payments combined is expected to be larger during the first half of 1935 than during the first half of 1934 but after mid-year the situation is more uncertain," according to the circular. However, with higher prices for animal products and a greater volume of crops for market probable, it is likely that farm income will be maintained.

In regard to the cost outlook, the report indicates some further advance during 1935, based on the trend of farm and family expenses. While expenses may increase enough to largely offset the expected moderate increase in farm income, all types of farming considered, the report points out that certain enterprises will undoubtedly fare better than others.

With some exceptions, the market outlook during the next year is more favorable for animal products than for crop products, says the circular. Prices for meat animals will undoubtedly be much higher than in 1934, while feed grains and hay produced in 1935 are likely to be much lower, as the supply of feed in relation to livestock numbers in the country as a whole is expected to be much larger if growing conditions are about average, according to the report.

Dairy Chief to Speak at O. D. A. Meet Feb. 4-5

The forty-second annual meeting of the Oregon Dairymen's association will be held at McMinnville February 4 and 5, with A. H. Lauterbach, chief of the dairy section of the AAA as one of the principal speakers. Arrangements for Mr. Lauterbach to address the convention were made by Roger Morse, secretary of the association and extension dairyman at O. S. C., after it was found possible to shift the tentative dates of the convention a few days to correspond with the dairy chief's schedule. The complete program for the session has not yet been announced.
