The classes in homemaking which have been in progress during the past school year closed on May 9th. These classes have been divided into units of garment reconstruction, dining room service and etiquette, dressing to type, home nursing and home crafts.

One class of 2 hours, in each of two units has been given a week, the units covering from 4 to 10 weeks.

It is very probable that further classes may be organized in advanced work or new subjects in the fall. One very popular class over the state is that of first aid and one of distinct advantage to parents, school teachers and public workmen, such as highway and railroad employees.

Throughout the state of Oregon during the past year, between 12 and 13 thousand adults have been enrolled in classes. In many European countries the adult population has had its own educational program for years but in the United States it is being undertaken for the first time with the aim of making it permanent.

"The meaning of life lies in growth; education fosters that growth throughout life. Intelligence demands continual feeding, not over indulgence in childhood and adolescence, with a sharp decline at maturity."—Adult Education Journal.

Editorial At this time of the year it seems as though the students more or less neglect their work for pleasure.

And—don't forget the student body elections. That is another important factor at the present and cannot be neglected.

So—let us forget this idea of social activities for the present and think of the other things more important. After all, we get out of life just what we put into it, and we cannot go on forever planning only on the social side of life.
