This is re-flected in increased installment Mrs. Earl Cramer and Mrs. Floyd buying of new commodities the last few months, a practice nearly aban-doned in the readjustment period of the last few years.

There is now no secret that the last depression was caused by the wind being taken out of the credit inflation of 1928-29, symbolized have been visiting at the Olson largely by the "stock market crash." home returned to Fossil Sunday. Realization of what dried-up credit means came slowly to this section, but was forcefully impressed as one avenue of trade after another hung out the sign, "We Sell for Cash," and the strain broke the A. E. Porter backs of our banks.

It was the drying-up of the credit stream rather than any appre-ciable decrease in the volume of money that caused the last depression. However, some students mistook the situation as an offspring of money, and bethought themselves that the only way to save the child was to suckle more milk from its mother. Hence the talk of making more money as the only cure for depression.

Students who promote the credit inflation idea, cite that under normal conditions a very small proportion of trade is represented in money transactions, and that curinflation is reflected in alrency
