## **Potato Control Program** Will Be Launched Soon

Immediate organization of the new potato production control plan adopted by Congress has been de-cided upon by the AAA, even tho appropriation for its aministration was held up in the failure of the filibustered deficiency bill, accord-ing to word received from Wash-ington by the Oregon State College extension service. John B. Hutson, director of the division of tobacco, sugar, rice anr peanuts, will have charge of administration of the new act.

The purpose of the new act, which passed Congress by a narrow margin, is to remove surplus and adjust acreage so as to increase income of potato producers, says Mr. Hutson. Instead of being based on benefit payments and contracted acreage, the potato act proposes the levying of a heavy tax upon all ton-nage sold in excess of the national sales allotment for potatoes.

The federal men figure that the present parity price on potatoes would be approximately 90 cents a bushel, while the actual prevailing market prices are only about 45 per cent of this level. The allot-ment year for potatoes begins December 1, so that the plan will take effect December 1 of this year, although it is understood that all po-tatoes produced prior to that are exempt from the control plan.

The act was proposed by con-gressmen from commercial potato producing centers and was included in the amendments to the Agricultural Adjustment act asked for by the administration. Under the plan states will be given allotments on the basis of past production and acreage. In turn such tax-free allotments will be given counties and individual potato farms.

On all potatoes sold in excess of allotments a tax of one-half to three-fourhts of a cent a pound will be levied as a means of practically restricting sales to the prearranged quota. Potatoes sold for export are to be exempt from the tax, as are potatoes used under certain condi-tions for manufacturing into byproducts or for livestock feeding.

Approximately 95 per cent of the state's allotment will be available to farms on which potatoes were grown in the 1932-34 base period, while the remainder is reserved for new producers or others ineligible for an ordinary allotment. Approx-imately 61/4 million farms in the United States reported potato production in 1929, but only about onefourth of these grew potatoes commercially. The new program is to be concerned primarily with those who grew potatoes for sale.

## NOTICE.

No trespassing or hunting will be permitted on the D. Cox and D. O. Justus land in Morrow county. Anyone found trespassing or hunting on this land will be prosecuted to the full extent of the law.
