**Wheat Adjustment Safeguards Wheat Income**

**HIGHLIGHTS OF WHEAT ADJUSTMENT**

- 1 Adjusts Production to Demand
- 2 Increases Farm Purchasing Power
- 3 Provides Adequate Supplies
- 4 Encourages Sound Farm Practices
- 5 Is Based on Voluntary Cooperation

THIS chart shows how the Agricultural Adjustment Administration wheat program has safeguarded wheat farmers' income. For 1932 when there was no program, cash income to farmers from wheat was \$196,000,000. For 1934 higher prices and adjustment payments brought a cash income of \$391,000,000. The wheat program seeks: (1) to produce wheat for available markets; (2) to increase farm purchasing power; (3) to produce adequate supplies at all times for domestic use; (4) to encourage sound farming through diversion of land to soil-improving and erosion-preventing crops; and (5) to make voluntary cooperation more profitable to farmers than non-cooperation.

**HARDMAN**

By LUCILLE FARRENS

Mrs. C. H. McDaniel was given a clever birthday party at her home here last Monday afternoon, Oct. 21, when she was purposely invited out to a birthday dinner at the home of Mrs. Blaine Chapel, and while enjoying herself there, a host of friends assembled at her home, gaining admission to her house by the aid of a passkey, then relocating the door. Presently, a friend, Mrs. Jim Hams, called at the Chapel residence and asked Mrs. McDaniel to go to her home for a quilt pattern. When the ladies arrived at her home, Mrs. McDaniel unlocked the door and walked into the room to find her many friends assembled there to wish her a happy birthday. Mrs. McDaniel was then presented with a basket of birthday gifts. A delicious lunch brought the party to a close. Present were Mesdames LaVelle Hams, Delsie Chapel, Frances Leathers, Helen Steers, Opal Adams, Ethel McDaniel, Ella Bleakman, Kate McKetric, Mary Brannon, Gladys Burnside, Ella Farrens, Annie Leathers, Elsie Leathers, Bertha Johnson, Mary Rowell, Effie Stevens, Ina McDaniel, Reta Knighten, and the Misses Zetta Bleakman, Charlotte Adams, Dolly and Lucille Farrens. **WILLOWS GRANGE NEWS.**

The Home Economics club of Willows grange met Friday at Cecil with Mrs. Annie Krebs and Mrs. Ida Kopp as hostesses. Twenty-three members were present and the following were guests: Mrs. Jack Hynd, Cecil; Mrs. Yarnell and Miss Margaret Ely, Ione; Mrs. John Troedson and Mrs. W. Crawford, Morgan. A beautiful quilt presented by Mrs. Fred Pettyjohn of Morgan and finished by the club, was presented to Mrs. Jesse Deos.

As most of the household effects and keepsakes had been lost in the fire last summer the quilt is of special value to the Deos' having been pieced by Grandma Deos a number of years ago. The next meeting of the club will be an all-day meeting with pot luck dinner at noon. Election of officers for 1936 will be a part of the business routine. Friend husbands will be dinner guests.

On November 9th Willows H. E. C. will sponsor a program and bazaar in Ione to be followed by a dance. Everybody invited.

We are happy to announce at this time the coming of many state grange officers to Ione on Wednesday, Oct. 30. The personnel of the convention will include State Master Ray W. Gill, Portland; State Lecturer Alice Goff, Roseburg; State Secretary Bertha J. Beck, Albany; E. Com. Member Geo. A. Palmiter and Mrs. Palmiter, state H. E. C. chairman, of Portland; State District Deputy Chas. W. Wicklander, La Grande; Mrs. Gertrude Skow Sanford, recreational leader, Corvallis, besides several state committee chairmen.

The morning session, opening at 10.30, will be entirely group discussions led by the state officers. Dinner will be served at noon to the visiting grangers by Willows grange.

The afternoon program will include singing led by Mrs. Sanford and talks by the state officers. The convention will recess at 5:15 with

dinner at 6, to convene again at 7:30. Mrs. Sanford will again lead in singing, followed by organized recreation.

The masters, lecturers, secretaries, agricultural and H. E. C. chairmen are requested to register at 10:30, also and other grangers who attend the morning session. Other grangers please register throughout the day.

Willows grange meets on Saturday, Oct. 26, at Cecil.

**Spray Compounds Kill Beetles**

Dallas—Trials of Rotenone or Derris spray compounds by Polk county farmers were uniformly successful on cucumber and flea beetles, but were entirely ineffective on red spider on hops, according to J. R. Beck, county agent. Farmers cooperating with Mr. Beck in the trials on cucumber beetles were W. H. Brown, Carl Iverson and Emil Stevens.

**THE NEW FORD V-8 FOR 1936**

Why do we say **The New Ford V-8** for 1936?

What is **new** about it?

Of course, the **newest engine** in the low-price car field is still the V-8 engine. Since Ford made it available to all car users (keeping it as economical as cars with fewer cylinders) the Ford V-8 has been the **newest engine** on the market, and remains the **newest** for 1936.

You may buy a car on minor "talking points"—some specially advertised feature "with the car thrown in"—but after all, it is the **engine** you buy when you buy a car. Hence we put the engine first.

**Other new points about the car make a long list.**

Its lines are much more beautiful. The hood is longer and sweeps forward over the distinctive new radiator grille, giving the car a length and grace that are instantly impressive. The fenders are larger, with a wide flare. Horns are concealed behind circular grilles beneath the headlamps. New steel wheels.

Ford upholstery—always of sterling quality and excellent taste—is rich and enduring. The appointments of the car have a new touch of refinement. There

is no question about the increased beauty of the Ford V-8 for 1936.

**In more practical matters, many improvements have been made—**

Steering is made easier by a new steering gear ratio. The cooling system circulates 5 1/2 gallons of water through a new, larger radiator. Natural thermosiphon action is assisted by two centrifugal water pumps. New style hood louvres permit a rapid air-flow around the engine.

Easier, quieter shifting of Ford gears—The gear shift lever now travels a shorter distance.

**The two qualities you want in brakes—**Brakes that stop the car with ease and certainty. Ford Super-Safety Brakes of the long-tested, fool-proof, mechanical design.

**Safety—as always—in the electrically welded genuine steel body. Safety Glass** all around at no extra cost. Hundreds have written grateful letters because this glass has protected the safety of their families.

**A car you can drive without strain all day, if you like, in city or country. Steady, holds the road, responds to the**

driver's touch like a well trained horse. You don't have to "push" or "fight" the Ford V-8—driver and car easily get on terms of good understanding with each other.

An engine has much to do with the roominess of a car. Very much indeed. A long engine uses up car space. The compact V-8 engine permits much of the ordinary engine space to be used by passengers.

It really is a great car in every way, this 1936 Ford V-8—the finest, safest, most dependable Ford car ever built. Now on display by Ford dealers.
