### P. T. A. Meeting at Boardman.

A P. T. A. meeting was held in the Boardman school auditorium Monday night, November 25. After a short business meeting the meeting was turned over to Mrs. Sundsten, program chairman.

The first number on the program was a vocal solo by Miss Turner. Next was given a series of talks by various townspeople and teachers. Mr. Packard gave an interesting account pertaining to the history and development of the Boardman school system and the Boardman community. Mr. Black, the vocational instructor, spoke on "Vocational Education in Our Schools." He stressed the importance of real home projects being carried on at the same time that the class work is being accomplished, and pointed out how much progress has been made in this field in recent years. "New Methods in Reading and Writing" was the topic which Miss Johnston developed. This was in regard to primary training and the stressing of early proper primary teaching.

These discussions were all very interesting, educational and well worth giving ones' attention. Plans are being made to have several similar meetings in the future.

### Interpreting the Value of an Education

An education should equip us to make a life, not merely to make a living. As a general rule when we think of education, especially higher education, we think of it as the laying of a foundation for making our living. This is one of the more important reasons, but it should not necessarily be the most important one for obtaining an education. From our education we should obtain the value of making our life more agreeable and enjoyable to ourselves and others; we should learn how to work efficiently, for later in life we are often judged by the work we do. In addition to learning how to work efficiently, we should learn how to utilize leisure time wisely and enjoyably. Wasting our spare time is a fault common to many of us. If we would learn to use our leisure time wisely and enjoyably, it would be an achievement well worth accomplishing. Pleasurable mental and social recreation is highly important in well-balanced living.

### More Action and Acting

An entertaining and very well-balanced program will be given by the Public Speaking class and faculty on Thursday, December 19, for the benefit of the hot lunches. This year the hot lunches are being served to the students free, and in order to continue the lunches, we urge the community to attend the program.

The Public Speaking class, under the supervision of Mr. Evans, is going to present two one act plays. One is a very clever comedy entitled "What's Trump?", given by four boys in the class. The other is a Christmas play entitled "A Christmas Awakening." This includes seven characters who have been chosen from the Public Speaking class.

The main feature of the evening is a one-act play, "Finger of God," by Percival Wilde, presented by the high school faculty. This is a powerful drama of conflicting emotions. The cast includes three of the faculty members: Mr. Evans, Miss Rockhold and Mr. Pevey.

Tickets to these plays will be available in a short time. Don't forget the date—Thursday, December 19—and let's see a good crowd at the performance.

### New Suits for the Team

Season tickets to all the home basketball games are now available and may be purchased from any member of the basketball squad. These tickets entitle the owner to see nine, and possibly more, basketball games this season. There may be some double-header games so it will be well worth the price of the tickets, which are \$1.25 for adults and 50c for grade school students.

The purpose in selling these tickets is to raise money to buy new basketball suits, for which the team is badly in need as the ones which they have at present are old and very much worn. Effort is being made to sell enough tickets right away to buy these new suits before the first home game, which is December 10.

As citizens of this community it is your duty to support your school and its teams. It will be greatly appreciated by both the team and the student body if you buy one of these tickets. The team will do their best to show you their appreciation at these home games.

### Benzine Ring

The Benzine Ring has decided upon two beneficial means of entertaining and of being entertained. They have decided to have guest night once each month, at which

time they will perform different experiments in chemistry problems. They also have planned on having speakers from the school faculty and townspeople. These speakers are to lecture on their hobbies or other topics of interest to them.

Hoop Season Opens  
The Heppner hoop squad journeyed to Pilot Rock for the opening practice game of the pre-season campaign last Wednesday.

A veteran Pilot Rock team, with two months' practice and three games' experience behind them, proved a bitter pill for the untried Irish. The fact that part of the squad had only two days' practice showed up noticeably in the ragged ball handling and defense work. Pilot Rock 27-Heppner 10. Strenuous work over the Thanksgiving holidays has, however, shown a marked improvement in shooting and passing among members of the squad. Heppner will present a strong team for their first home game when they play Umatilla on the 10th.

**DOCTORS KNOW**  
Mothers read this:  
THREE STEPS TO RELIEVING CONSTIPATION  
A cleansing dose today, a smaller quantity tomorrow; less each time, until bowels need no help at all.  
Why do people come home from a hospital with bowels working like a well-regulated watch?  
The answer is simple, and it's the answer to all your bowel worries if you will only realize it: many doctors and hospitals use a liquid laxative.  
If you knew what a doctor knows, you would use only the liquid form. A liquid can always be taken in gradually reduced doses. Reduced dosage is the secret of any real relief from constipation.  
Ask a doctor about this. Ask your druggist how very popular liquid laxatives have become. They give the right kind of help, and right amount of help. The liquid laxative generally used is Dr. Caldwell's Syrup Pepsin. It contains senna and cascara — both natural laxatives that can form no habit, even in children. So, try Syrup Pepsin. You just take regulated doses till Nature restores regularity.

"The holidays are fun for me, too... since I have this electric range!"  
TIRED OF COOKING DRUDGERY? Then ask your "Santa" for an electric range!  
An electric range is a mighty practical sort of Christmas gift to ask for, but it's a mighty sensible one if you're cooking by some old-fashioned method. Every time you use an electric range, you get a present of extra help, of extra time and of tastier food. Cooking electrically is a pleasure—not monotonous labor.  
With an electric range a turn of a switch gives you a clean, constant, direct heat that starts food cooking at once. A temperature control does your oven watching for you. You have no blackened pans to scour. The shining porcelain enamel finish is both so beautiful and so easy to keep spotless.  
Low electric rates, minimized food shrinkage, toothsome meals from less expensive foods—all these combine to make electric cooking economical cooking. Why not change to electric cooking and make this Christmas really merry? Electric ranges are very reasonably priced, and they may be purchased on convenient terms!
