Another year, another semester, and another chance to make good. Are we going to take advantage of this chance or just pass it by?

When we have finished school, we should like to look back and be proud of our school days, because we were one of the bolts that held the machine together.

This new semester gives us another chance to be better students, and make our school a better one. Let us make use of this chance by starting out the new semester right.

Let us do our best in keeping our work up, in getting our assignments and in supporting our school. We cannot be the best in the class perhaps, but we can do as the poet, Douglas Malloch, advises:

"If you can't be a highway, then just be a trail, If you can't be the sun, be a star; It isn't by size that you win, or you fail; Be the best of whatever you are."

Semester Examinations The semester examinations are to be given on Thursday and Friday of next week. The examinations for the morning classes will be given on Thursday and the afternoon classes on Friday.

Grade School News The first graders are working on farm problems and farm animals. These youngsters have acquired a great deal of reading material to promote their knowledge about the farm. The third graders are also studying animals.

This question is: "Resolved, that the several states should enact legislation for a system of complete medical service available to all citizens at public expense." This question, as is evidenced, should be of great importance to everyone.

HOMework GETS DONE FASTER AND BETTER WITH AN I. E. S. BETTER SIGHT LAMP

This new I. E. S. Better Sight Lamp Helps Prevent Eyestrain

Is your child reluctant to do his homework? If he is, the fault may be with the lighting under which he works. For poor lighting makes his homework unnecessarily difficult. It increases eyestrain and fatigue, which eventually may result in defective vision.

1. Wide opening at the top of the shade throws light to ceiling and eliminates shadows. 2. Glass reflector softens light, prevents glare. 3. Wide shade gives ample light over your work. 4. Shade lining is white to reflect more light. 5. Lamp is high enough to light a large working area. 6. Look for the certification tag.
