Declare for kitchen freedom and tastier meals

by changing to clean, convenient Electric Cooking!

 Tired of slaving long hours over a hot stove? Tired of lugging in fuel? Tired of discouraging results day after day?

You owe it to yourself to change to electric cooking. You should have a range that directs all of its surface heat into utensils and that retains oven heat where it belongs. You should have a range that begins working for you as soon as you snap a switch. You should have a range that you can control as you desire - one whose oven temperature remains uniform throughout baking or

You enjoy all of these advantages when you have an electric range. And you enjoy them at low cost, too. For low electric rates, elimination of cooking failures and savings in cleaning and decorating bring distinct economies.

Modern electric ranges are very reasonably priced. They are sturdily constructed to give years of carefree service. They are finished in durable porcelain enamel that stays bright and shining and easy to clean. Their designs are based on simple lines that will stay in style.

Don't just long to cook electricallyact now! Visit any dealer in electrical equipment or our nearest office today. See the new electric ranges and all the handy features they contain.

But don't stop there. Inspect the new electric refrigerators and water heaters, too. You're certainly going to want to build toward an all-electric kitchen once you enjoy the conveniences of electric cooking.

The ovens of electric ranges aren't tempermental. After you set the oven temperature control for the correct heat, your worries are over. When the baking time for your cake, pastry or bread has elapsed, you know that it's perfectly raised and browned, ready to remove. No guesswork-no oven peeking.
