Erosion Control Value Seen
Corvallis—Two-fold advantages from soil erosion prevention practices are to be noted in the Eddy peach orchard near Monroe in Benton county, reports O. T. McWhorter, O. S. C. extension horticulturist. Mr. Eddy last fall covered his entire cultivated hill-land orchard lightly with straw. The straw had some grain which grew up through the covering. When observed recently this orchard showed no erosion at all, and in addition there was some cover crop to work down along with the straw. The addition of this humus-forming material will place the orchard in a more favorable condition to grow a better cover crop and will lessen the tendency to erosion in the future, McWhorter points out.

Watkins FLY SPRAY

Kills and Repels Flies Without Injury or Discomfort to Your Stock

Dead flies don't breed. Watkins Fly Spray does more than repel flies—it kills them so that they don't multiply. This superior fly spray is clean and will not discolor or gum up the hair of stock. Nor will it burn the hide or cause discomfort. Because it will not taint the milk you can use it before milking and milk your cows in comfort. Fine for the milk house. Also good for use in the house.

VERY ECONOMICAL TO USE

When one ounce of heavier oil Spray is required to do the job for each animal, only 1/4 ounce of Watkins Spray is needed. That also saves money for you. I'll be seeing you soon to take care of your needs. Buy no Fly Spray until I have seen you.
