Official Paper for Morrow County

### Where Are We Headed?

AMERICA has assumed a defeatist philosophy. The New Deal tells us we will always have a vast army of unemployed and that we must prepare to take care of it...

The government checks which have come to Morrow county farmers for not raising wheat have added to that idea. They came at a time of crop failure and represented about the only source of income to numerous farmers. Naturally, the recipients and the business men with whom they traded were grateful.

But where did the money come from? At first a tax was levied on the proceeds of the wheat to bring it. The supreme court ruled that method unconstitutional because, they said, it is unfair to tax one class for the benefit of another class...

Whether government checks are paid by special or general taxes, however, the ultimate effect is the same. The only true wealth in the country is represented by what comes from the soil on application of hard labor, and when that burden is shifted down to its ultimate conclusion it is found to fall upon that wealth; so that in the ultimate the producer must eventually pay for the checks received...

Few people in Morrow county will object to having drawn against the future to carry them through a time of stress. But all should be interested in knowing how far that course is to be pursued. If, as New Dealers say, things are now moving along at the peak, it is time to call a halt on borrowing.

There are those in America who believe that if the government would withdraw its paternalism and encourage capital into private industry rather than discouraging it, the wheels of industry would turn at a rate that would absorb most of the unemployed manpower in the country while again permitting it to feel the just rewards of honest endeavor. So long as the threat of an unstable currency and the bait of a low interest rate on tax-free government bonds exist, combined with the threat of capital in private industry being taxed out of existence, the industrial structure in this country is not going ahead. Those who believe that re-orientation and paternalism are necessary, should hearken back to pre-New Deal days when under a truly American form of government this nation became the greatest nation on earth. It is now in thirteenth place among nations in recovering from the depression which hit other nations with equally as devastating effect as it did the United States.

# "The Universal Car"

ONE NAME comes quickly to mind when you think of "The Universal Car." The description is distinctively Ford. No other car is used by so many millions of men and women in every part of the world. Everywhere it is the symbol of faithful service. That has always been a Ford fundamental. Something new is constantly being added in the way of extra value. Each year the Ford has widened its appeal by increasing its usefulness to motorists. Today's Ford V-8 is more than ever "The Universal Car" because it encircles the needs of more people than any other Ford ever built. It reaches out and up into new fields because it has everything you need in a modern automobile. The Ford V-8 combines fine-car performance, comfort, safety and beauty with low first cost and low cost of operation and up-keep. It depreciates slowly because it is made to last. There is no other car like it.
