

Oregon Tops Control Of Bangs Disease

Oregon dairy and cattle herds showed 10 percent reaction to Bangs disease tests in 1935. Last year the figure dropped to 3 percent, and so far this year only 1 percent reaction is being revealed. This is the report of Dr. L. L. Taylor, veterinarian in the federal service, now at work in this section.

Dr. Taylor said the federal program calls for continuation of the work in Oregon until the disease is entirely eradicated. Then an extension of the work will be made over the nation, state by state, until the same result is accomplished on a national scale. Oregon, so far, is way ahead of all other states in the work, he said.

Easter is the climax of Holy Week. It marks the decisive victory for the Christian and the end of hope to the unbeliever. Christianity has no happy medium. The world either rises to new hope with the risen Lord or breaks itself against the rock Christ Jesus. No church, no pastor has a right to offer several choices to his people. Jesus said, "He that is not for me is against me." God help us to make right choices.

At the 11 o'clock worship service on Easter morning there will be an Easter sermon and a selected Easter cantata by the choir. An invitation is extended to any who are without a church home. New members will be received into fellowship. All members of the church are urged to participate in the Easter services.

In the evening there will be a union meeting of the young people of the churches at 6:30 and at 7:30 the young people's groups will present two sacred dramas telling the Easter story.
