4-H Summer School Work Described

By JAMES PECK

Our trip to the 4-H summer school started June 7. Ellwynne Peck, Billy Biddle and myself making the trip with County Agent Joe Belanger to Arlington where we boarded the 4-H club special train. We arrived at Corvallis about 5 o'clock Monday evening.

We were met at the train by Homer Cherry, overseer at Beta Kappa fraternity house, where I checked in and dressed for dinner. Twenty-eight clubbers were enrolled here. Other members from Morrow county were registered at other fraternity and sorority houses about the campus.

Tuesday morning all boys met on the football field and were divided into eight sections according to their ages. Each section constituted a class for instruction, divided into four periods of an hour each dur-

ing the morning. After lunch an hour was spent in rest or recreation.

At 2 o'clock we assembled at the men's gym for general assembly. A program was arranged of club songs. Speakers of note were introduced and spoke to us each day. After assembly athletics were enjoyed. Each fraternity group chose a baseball and volleyball captain, who picked a team. Inter-fraternity games of baseball and volleyball were played from 3:30 to 4:30 each day. Swimming was enjoyed at the natatorium from 4:30 to 5:30 by many members. From 5:30 to 6:15 we made ready for dinner. At 8 o'clock different county groups gathered at radio station KOAC and broadcast a few words. Other groups attended evening assembly where we enjoyed radio plays, wild life pictures and talkies.

Two dances were held at the Women's building. Throughout the two weeks club members of fraternity houses exchanged dinners with club members of sorority houses. Sunday an excursion was made to the

ocean at Seaside by many of the members.

My daily classes consisted of two general topics, livestock and plants. Livestock consisted in judging cattle, horses, sheep and hogs, bringing out the desirable and undesirable points of each.

Under plants was the selection of seeds. Four samples of seed were to be arranged in order according to purity, uniformity of size, fowl material, and off color. Other topics of interest were handling of seed to best advantage, the grading of seeds, methods of planting, and selection of varieties for various crops, etc.

There were more than 1700 clubbers at the summer school, 161 of which scholarships were, like my own, grange sponsored.

Raymond H. Turner, manager of Lexington Oil Co-op, was transacting business in the city Tuesday, reporting farmers in his section feeling mighty good over the abundant showers of the last two weeks.
