**Sentinels of Health**

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure.

When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out.

Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance.

The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use Doan's Pills. They have had more than forty years of public approval. Are endorsed the country over. Insist on Doan's. Sold at all drug stores.

## STATE CAPITAL NEWS

(Continued from Page Six)

the current year, the reports show. Only four counties failed to reduce their tax delinquencies. These were Clackamas, Jefferson, Malheur and Tillamook.

More men are now at work in Oregon industries than at any previous time in the history of the state if figures compiled by the State Industrial Accident commission can be accepted as a fair criterion. During the fiscal year ending June 30, reports of the commission show, there were an average of 109,094 men employed daily in the industries which have accepted the provisions of the Workmen's Compensation act. This accounts for a total of 34,037,-241 man-days during the 12-month period. Previous high record was set in 1929-30 when 33,500,000 man-days were worked. The average daily wage is also up to a new high point at \$4.30 compared to the low wage level of \$3.13 reached in April, 1933.

Miss Daisy Bevans, who served Clackamas county as a state representative in the recent legislature, let it be known on a visit to Salem this week that she now aspires to a seat in Congress and will probably seek the Democratic nomination.

There is a greater percentage of illiteracy in Klamath, Jefferson and Sherman than in any other counties in the state but even there the rate is far below the national average, figures compiled by the state department of education show.

**Fowl Pox Protection is Easy, Sure, Profitable**

Frequent occurrence of fowl pox in unvaccinated flocks last winter has emphasized the fact that it pays to take this certain precaution regularly against this wholly preventable disease, says H. E. Cosby, head of the poultry department at Oregon State college.

each year after its first appearance, unless controlled by immunization. It does not necessarily reappear each year, but it may," says Cosby. "In this day of farm visitors, rodents, birds, used crates, feed sacks, purchase of new stock, and dozens of other possible carriers of virus, it just isn't good head work on the part of any producer to place the welfare of his flock on the gambler's wheel of chance."

The accepted method of immunizing young birds against fowl pox was developed by Dr. W. T. Johnson, poultry pathologist at the Oregon experiment station. It is much more simple and certain than older methods.

## RAILROADS GREATER MENACE

Oregon railroad data compiled by the Oregon State Motor association reports that an additional 4,130 persons were injured in highway-grade crossing accidents last year.

## REPORT ACCIDENTS

The national average accident frequency rate among industries was 13.57 disabling injuries per 1,000,000 man-hours worked during 1936, finds the Oregon State Motor association.
