## CLUBBERS RETURN FROM PORTLAND

Awilda Bleakney, Elwynne Peck Enjoy Bank's Hospitality in Attending P. I. Exposition

Morrow county's outstanding 4-H club girl and boy, Awilda Bleakney, Boardman, and Elwynne Peck, Lexington, returned home last Wednesday from a three-day visit to the Pacific International exposition which was their award as winners in The First National Bank of Portland Achievement and Leadership contest for this district.

Portland proved a hospitable city, the two reported, and the entire group of 74, guests of the bank, received every courtesy.

In addition to daily Pacific International visits, high points of the party were a 4-H club banquet in Penney hall on the exposition grounds Monday night, the 4-H parade and horse show which followed, scenic tours of Portland, and a special dinner and dance Tuesday evening. On Wednesday they attended the 4-H auction of fat stock before returning home.

Three of four outstanding Oregon 4-H young people chosen by club leaders at the state fair in September were members of the bank group. They were Geraldine deLancey, Corvallis; Claire McClain, Lebanon, and Robert Zielinski, Salem. The fourth was LaVerne Whitehead of Turner. Many of the boys and girls went home with prizes won on exposition exhibits in both 4-H and open classes.

"From all indications, the party was a great success," a bank official reported. "Each guest represented his county in a manner that reflected honor to his club mates at home. The First National bank was fortunate to have made the acquaintance of these admirable young people."

visors with regulations of the 1937 program.

Considerable confusion seems to have arisen among farm operators as to the payment for trashy summerfallow. In the docket this practice is defined as follows: "Trashy summerfallow. When crop land is summer fallowed in such a manner as to leave all crop residue on or near the surface of the soil to prevent erosion from wind or water, and no straw or stubble is burned or otherwise removed from such land." In the last analysis, it becomes the duty of the county committee to determine whether trashy summer fallow on a particular place is genuinely effectuating the purposes of the act by controlling wind or water erosion, or whether having previously scattered all of this straw and farming the land during the summer in such a way that the major part of the straw is maintained near the surface, an operator may be conducting cultural practices on such land as in the opinion of the county committee tends to reduce the effectiveness of the trash in controlling blows.

To quote regulations again: "No person shall be entitled to receive payment if such person has adopted any practice tending to defeat any of the purposes of the 1937 program." Under this regulation, it would not only be the committee's

option, but its duty, to consider carefully practices involved in handling trashy summer fallow.
