late Mr. Mahoney of Heppner, to Cecil Jefferson Espy, Jr., son of Mr. and Mrs. Cecil Jefferson Espy of Portland, was solemnized at a beautiful ceremony October 16 in St. Mark's Episcopal church. Rev. Lansing E. Kempton officiated. Preceding the ceremony Miss Ruth Mahoney sang.

The bride, who was given in marriage by her brother, Philip W. Mahoney, wore her mother's wedding dress of ivory silk and lace and a long tulle veil arranged in a cap caught by orange blossoms. She carried an old-fashioned bouquet of Johanna Hill roses, lilies of the valley and Humboldtii bouvardia.

The maid of honor, Miss Vera Mahoney, the bride's sister, wore a turquoise velvet dress with matching toque and carried a spray of asters.

John Carroll Espy acted as best man for his brother, and ushers were Robert L. McCulloch, William A. Palmer, Robert C. Christensen and Robert M. Hall.

After the ceremony a reception was held at the home of the bride's aunt and uncle, Mr. and Mrs. Thomas J. Mahoney. The bride's table

was decorated in white and ivory flowers and tapers. Miss Nancy Forestel served the cake. Mesdames William E. Kemery, Jr., and Thomas J. Mahoney, Jr., poured. Miss Martha Woodruff served the punch.

Assistants about the rooms were Mesdames Robert C. Christensen, Philip W. Mahoney and the Misses Ruth and Margaret Mahoney, Julie Wilson, Barbara and Katherine Espy.

For going away the bride wore a costume suit of Wallace blue trimmed in Krimmer. Her accessories were of navy and her corsage of orchids and lilies of the valley.

Both attended the University of Oregon, where the bride was affiliated with Chi Omega and the bridegroom with Sigma Chi. Mr. Espy later graduated from Oregon State college.

After November 1 Mr. and Mrs. Espy will be at home in Boise, Idaho.

The "CAT"

These cold mornings make Caterpillar owners appreciate its independent starting system, making possible a Diesel engine designed for minimum wear and fuel economy.

See a footballer trotting on the side lines; horses practicing before the race; airplanes "revving" their engines before the take-off.

—It's the conditioning period known as "warming up." "Caterpillar" Diesel engines use it. The starting engine (strictly independent) turns the big engine over to break the oil film, runs it against compression, but without fuel until it is warm.

Thus is the "Caterpillar" Diesel conditioned for starting—cylinder temperatures are sufficient—oil is flowing to vital parts—before the engine starts.
