Cooperation Asked For School Census

An appeal for general cooperation of all citizens of the county in taking the annual school census was made by Mrs. Lucy E. Rodgers, county school superintendent, before the Monday LIONS luncheon. Mrs. Rodgers called attention to the fact that clerks of the various districts would be taking the census shortly and that it is to the advantage of each district to have the census complete. All children between the ages of 4 and 20 are eligible for registration and the county and state school money is apportioned among the districts according to the number of registrants.

Mrs. Rodgers also asked that people cooperate in listing children handicapped by sight deficiency. The state blind department has asked the district clerks to assist in making a complete record of blind cases in the state, and those suffering from defective sight to the extent of not being able to distinguish the fingers of one hand when held at arms length are to be listed as sightless.

A report of the annual schoolmasters convention which he attended last week end at Salem was given by Alden Blankenship, local school superintendent. Of especial public interest he believed were the reports on curriculum changes and experiments being made over the state. Henry Tetz of Adams, former principal here, was among those reporting and the discussions he assisted in leading held the close attention of everyone, Blankenship said. The trend noted in this work is away from the old system of awarding high school credits upon a set number of subjects, and rather arranging the curriculum into broader fields to give a wider fundamental scope of all fields of knowledge.

Mr. Blankenship saw the Oregon Frosh-O. S. C. Rook football game in Portland Saturday night, and reported that La Verne Van Marter, former Heppner high star, went into the game for the frosh in the second quarter and remained throughout the play, turning in a nice performance.
