Dumb Victim of Hunt Taken as Pet At French Ranch

One of the soul-racking sides of the annual hunting season is the number of wounded animals that are left in the woods. Hunters, generally, do all in their power to run down the buck deer or bull elk they know they have injured. Sometimes, their best efforts are not sufficient, however, and at other times an animal is severely wounded without the hunter becoming aware of it.

Several cases of injured deer not being found were reported in the last hunting season. One such dumb victim was found out at the W. H. French ranch south of Hardman this week.

The animal was discovered standing alone in a thicket. It stood there, listlessly, for two days, apparently not caring to move and plainly quite ill. Mr. French, learning of the animal's condition from his hired man, caused hay to be taken to it, then contacted State Patrolman Bill Francis at Heppner. Mr. Francis and Logie Richardson, president of Morrow County Hunters and Anglers club, went out to investigate, and Francis gave Mr. French permission to move the animal on Mr. French's offering to treat it as best he could. The animal had been shot through the brisket.

Mr. French took out his sled and rope. As he approached the sick animal shook its head in a faint show of resistance, but he succeeded in tying its legs, loaded it on to the sled and took it to the barn. At first it didn't want to eat or drink, but Mr. French coaxed it along, and he reported when in town Saturday that it was showing signs of much improvement and is becoming quite a pet.

The animal, a nice four-point buck which Mr. French described as "bench-legged" because of its short legs and quite heavy body, has been named "Bill Francis" in honor of the game policeman.
